### **How to Master the BMAT**

### **Concepts and Challenges in Science New York Proficiency Review Book**

Covering all subjects on the GED test, this invaluable guide gives you the essential review and practice needed to succeed on the exam. With more than 125 years of experience in education, McGraw-Hill Education is the name you trust to deliver results. This MHE guide to the GED is the most comprehensive and relevant prep tool on the market. Inside this book, you will find:

- 2 full-length practice tests
- A step-by-step review of the concepts essential to each of the test's 4 sections: Reasoning Through Language Arts, Mathematical Reasoning, Science, and Social Studies
- TOP 25 lists that tell you the most important concepts you need to know for each test's section
- Unique test-taking strategies to help you avoid the test maker's traps
- Tools to help you approach specific questions types in the most efficient way

3 Score-Raising Apps:

- With the Practice Test App, you can take the book's 2 full-length practice tests on your smartphone or tablet
- The Flashcard App will help you review 100 key topics that span all 4 test sections
- The customizable Test Planner App allows you to set your own study schedule

The learning objectives in Preparation for the GED Test are based on the Common Core State Standards. This means that you can use this book as a base for study on all high

school equivalency exams.

## **Cracking the SAT Biology E/M Subject Test, 15th Edition**

Ken Jennings's Trivia Almanac is the ingeniously organized book where, for a change, the all-time Jeopardy! champ gets to ask the questions—and where every day of the year will give you the chance to test your trivia mettle. For example—February 21: In 1912, on this day, Teddy Roosevelt coined the political phrase “hat in the ring,” so Ken Jennings fires off a series of “ring” questions. What two NFL quarterbacks have four Super Bowl rings each?\* What rings are divided by the Cassini Division?\*\*\* Also on this date, in 1981, the “goth” music scene was born in London, so here's a quiz on black-clad icons like Darth Vader, Johnny Cash, and Zorro. Do you know the secret identities of Ivanhoe's Black Knight\*\*\* or Men in Black's Agent M\*\*\*\*? In this ultimate book for trivia buffs and other assorted know-it-alls, the 365 entries feature “This Day in History” factoids, trivia quizzes, and questions categorized by Jennings as “Easy,” “Hard,” and “Yeah, Good Luck.” Topics cover every subject under the sun, from paleontology to mixology, sports feats to Bach suites, medieval popes to daytime soaps. This addictive gathering of facts, oddities, devilishly clever quizzes, and other flights of fancy will make each day a fun and intriguing new challenge. From the Hardcover edition.

### **McGraw-Hill Education Short Course for the GED Test, Third Edition**

The BMAT (BioMedical Admissions Tests) is a subject-specific admissions test taken by applicants to medicine, veterinary science and related courses at Cambridge, Oxford, Imperial College, UCL and Royal Veterinary College. With more students than ever achieving A grades at A-level, BMAT testing is becoming increasingly popular as a way for universities to identify the most able and dedicated applicants. How to Master the BMAT consists of six sections of revision materials for the maths, physics, chemistry and biology components of the BMAT, with additional notes for problem solving and the writing task. At the end of each of these six sections, a set of review questions enables you to check that you have the necessary core knowledge (some of which you will have already acquired through your GCSE and A-level studies). The additional mock tests should be attempted under exam conditions for the best possible preparation. They provide the equivalent of three full BMAT tests (nine papers). Whatever your knowledge base you are supported throughout the book and where possible each question is complete with revision topics, indicated in brackets.

### **Life Science, Grade 6 Science Puzzlers, Twisters & Teasers**

### **Science Insights**

Failure often presents a valuable learning opportunity, however, students may need motivational scaffolds to protect them from the negative psychological ramifications of failure. This work explored the effectiveness of a motivation-based intervention called an ego-protective buffer (EPB), that was designed to enhance persistence after failure. An ego-protective buffer (EPB) maintains a stable sense of competence by lessening the impact of failure on one's psyche. The specific instantiation of an EPB tested here was designed to elicit a combination of internal and external attributions for failure. External attributions protect one's sense of competence by averting the blame for failure away from the self, while internal attributions encourage students to take some responsibility for remedying the failure situation. Based on this theory, we embedded an EPB into the rule structure of a computer-based genetics game and unleashed it on 143 seventh graders. In the EPB condition, students were told that winning in the game was a probabilistic outcome, dependent on a combination of chance and skill on the part of the students. In the Control condition, students were told that winning in the game was a deterministic outcome, dependent on students' skill only. Students played the game during two class periods. Measures include pre- and posttests, motivational survey measures, and in-game behaviors. The EPB did have an effect on learning, but only amongst high-failing students. High-failing EPB students learned just as much as their low-failing counterparts. This was not so in the Control condition, where high-failing students learned far less than their low-failing counterparts. So the high-failing EPB group was behaving as if they were "buffered" from the effects of failure. We also found evidence of a possible mechanism behind this learning effect. In the high-failing EPB condition, students were equally likely to persist after success and failure, while in the Control condition, students were far more likely to persist after success, exhibiting risk averse behaviors. This difference was more exaggerated in a within-subjects comparison, contrasting the same individuals in situations of high and low failure. Finally, persistence after failure was associated with learning across the full sample of subjects. Regardless of condition or failure rate, students who persisted more after failure also learned more. This study, together with the author's related body of work, provides compelling evidence that an EPB is a viable intervention for encouraging persistence in the face of failure.
