The Cars of American Motors

Cars of Eastern Europe tells the story of the cars and vans made in Latvia, Poland, the former Yugoslavia,

the Czech Republic and Slovakia, Hungary, Romania, Bulgaria and East Germany. In a region that stretches from the Black Sea to the Baltic, the vehicles were as varied as the nations themselves. Now that eastern Europe has come in from the cold, this book offers a unique and timely survey of the motor industry in this often overlooked part of the continent.

Economic growth does not demand a secret formula. Good development examples now abound in East Asia and further afield in others parts of Asia, and in Central America. But why then has Africa failed to realise its potential in half a century of independence? Why Africa is Poor demonstrates that Africa is poor not because the world has denied the continent the market and financial means to compete: far from it. It has not been because of aid per se. Nor is African poverty solely a consequence of poor infrastructure or trade access, or because the necessary development and technical expertise is unavailable internationally. Why then has the continent lagged behind other developing areas when its people work hard and the continent is blessed with abundant natural resources? Stomping across the continent and the developing world in search of the answer, Greg Mills controversially shows that the main reason why Africa's people are poor is because their leaders have made this choice.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full access to all of Walter Hassan's papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company's takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.

The Definitive Firebird & Trans Am Guide 1967-1969

In the mid-1960s, Ford Motor Company took the automotive world by storm with the release of its new pony car, the Ford Mustang. It was the right car for the right time, and it caught General Motors a bit by surprise. One year later, after seeing the Mustang's enormous sales success, General Motors announced the development of its own pony-car platform, code-named "Panther," to enter the market and compete with the tremendously popular Mustang. And what a competition it became. Chevrolet Camaros and Pontiac Firebirds hit the market in the fall of 1966, and the world clamored for more of these new Mustang killers. Over the course of time, these F-Body cars became some of the most popular enthusiast cars of all time. In *The Definitive Firebird & Trans Am Guide 1967-1981*, Pontiac expert and historian Rocky Rotella examines each production year of Firebird. Production figures, option codes, running changes,

model year changes and variances, rarity, collectability, interviews with engineers, and more are thoroughly covered in what is sure to be the ultimate Firebird reference book for years to come.

Complementing the detail and year-by-year analysis is a combination of archival photography from the launch of these cars and beautiful color photos of original and restored examples today. Whether you are into the first generation of F-Body Pontiacs, the first Trans Ams in 1969, the early second-generation Super Duty cars, or even the wildly popular Trans Ams from the Smokey and the Bandit era, this book tells the entire story of these immensely popular cars. It is an excellent addition to any pony car, muscle car, or any enthusiast's library.

Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
