Stitch by Stitch

Winner of Parents' Choice Gold Award and endorsed by the National Wildlife Federation and the Massachusetts Audubon Society, this book includes 365 self-contained, fully-explained indoor and outdoor activities, observations, and experiences, coupled with charming illustrations.

Swifts in a Tower

The Uninhabitable Earth

We listen to a cacophony of voices instructing us how to think and feel about nature, including our own bodies. The news media, wildlife documentaries, science magazines, and environmental NGOs are among those clamouring for our attention. But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts, sentiments and activities to be unduly governed by others? *Making Sense of Nature* shows that what we call 'nature' is made sense of for us in ways that make it central to social order, social change and social dissent. By utilising insights and extended examples from anthropology, cultural studies, human geography, philosophy, politics, sociology, science studies, this interdisciplinary text asks whether we can better make sense of nature for ourselves, and thus participate more meaningfully in momentous decisions about

the future of life – human and non-human – on the planet. This book shows how ‘nature’ can be made sense of without presuming its naturalness. The challenge is not so much to rid ourselves of the idea of nature and its ‘collateral concepts’ (such as genes) but instead, we need to be more alert to how, why and with what effects ideas about ‘nature’ get fashioned and deployed in specific situations. Among other things, the book deals with science and scientists, the mass media and journalists, ecotourism, literature and cinema, environmentalists, advertising and big business. This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context, as well as study tasks, a glossary and suggested further reading. The case studies cover a range of topics, range from forestry in Canada and Guinea, to bestiality in Washington State, to how human genetics is reported in Western newspapers, to participatory science experiments in the UK. Making Sense of Nature will empower readers from a wide range of fields across the social sciences, humanities and physical sciences.

Garden Birds (Collins Gem)

Surveys the online social habits of American teens and analyzes the role technology and social media plays in their lives, examining common misconceptions about such topics as identity, privacy, danger, and bullying.

Lion Practice

This open access book identifies and discusses biodiversity's contribution to physical, mental and spiritual health and wellbeing. Furthermore, the book identifies the implications of this relationship for nature conservation, public health, landscape architecture and urban planning – and considers the opportunities of nature-based solutions for climate change adaptation. This transdisciplinary book will attract a wide audience interested in biodiversity, ecology, resource management, public health, psychology, urban planning, and landscape architecture. The emphasis is on multiple human health benefits from biodiversity - in particular with respect to the increasing challenge of climate change. This makes the book unique to other books that focus either on biodiversity and physical health or natural environments and mental wellbeing. The book is written as a definitive 'go-to' book for those who are new to the field of biodiversity and health.

Birds

The average person can name more bird species than they think, but do we really know what a bird “species” is? This open access book takes up several fascinating aspects of bird life to elucidate this basic concept in biology. From genetic and

physiological basics to the phenomena of bird song and bird migration, it analyzes various interactions of birds – with their environment and other birds. Lastly, it shows imminent threats to birds in the Anthropocene, the era of global human impact. Although it seemed to be easy to define bird species, the advent of modern methods has challenged species definition and led to a multidisciplinary approach to classifying birds. One outstanding new toolbox comes with the more and more reasonably priced acquisition of whole-genome sequences that allow causative analyses of how bird species diversify. Speciation has reached a final stage when daughter species are reproductively isolated, but this stage is not easily detectable from the phenotype we observe. Culturally transmitted traits such as bird song seem to speed up speciation processes, while another behavioral trait, migration, helps birds to find food resources, and also coincides with higher chances of reaching new, inhabitable areas. In general, distribution is a major key to understanding speciation in birds. Examples of ecological speciation can be found in birds, and the constant interaction of birds with their biotic environment also contributes to evolutionary changes. In the Anthropocene, birds are confronted with rapid changes that are highly threatening for some species. Climate change forces birds to move their ranges, but may also disrupt well-established interactions between climate, vegetation, and food sources. This book brings together various disciplines involved in observing bird species come into existence, modify, and vanish. It is a rich resource for bird enthusiasts who want to understand various processes at the cutting edge of current research in more

detail. At the same time it offers students the opportunity to see primarily unconnected, but booming big-data approaches such as genomics and biogeography meet in a topic of broad interest. Lastly, the book enables conservationists to better understand the uncertainties surrounding “species” as entities of protection.

Architecture in the Garden

Packed with make and do activities and over 200 stickers, The Snail and the Whale Make and Do book is a great gift for any child - ideal for rainy days and holidays. One little snail longs to see the world and hitches a lift on the tail of an enormous whale. Together they go on an amazing journey, past icebergs and volcanoes, sharks and penguins, and through sun, snow and stormy seas. Join in their adventures with this fun craft book - make a penguin pencil pot, create a tropical erupting volcano and find out how to turn an empty shoebox into your very own underwater world! Based on the bestselling picture book, The Snail and the Whale by Julia Donaldson and Axel Scheffler, creators of The Gruffalo.

Conservation Biology in Sub-Saharan Africa

101 Things to Do Outside

Laura loves to practise. She's been a kangaroo, a parrot and a crocodile - but nothing beats lion practice! It's fun to leap, and run and roar really loud, isn't it? Laura's patient parents aren't so sure. So when Laura takes a lion-sized leap too far, she gets a telling off. But like all good lions, Laura soon bounces back and it isn't very long before her Mum, Dad and baby brother are joining in the game. A warm, funny and reassuring book, which celebrates the joy of imaginative play and the importance of patience and family love. A lively debut from a brand new picture book talent.

Rules of Nature

A brand-new craft book for young crafters and makers ages 7 and up that features more than 20 step-by-step projects and inspiration to personalize each one. Packed with ideas for presents, wrapping, and cards, Jane Bull's Crafty Gifts includes everything from pretty picture frames to bath bombs and smelling salts to paper flower bouquets. Step-by-step instructions and visually stunning photography make each of the projects approachable and kid-friendly. Crafty Gifts shows young makers that it's always better to create a gift than to buy one!

The Anti-Boredom Book of Brilliant Things to Do

Billedbog. Introduces the sights and sounds of the changing seasons, along city streets and in country meadow

RSPB 365 Outdoor Activities You Have to Try

Can't tell a blackbird from a blackberry, a butterfly from a buttercup or a hedgehog from a hedgerow? This action-packed book filled with nature activities, facts and tales will tell you everything you need to know about how to get stuck into nature. From how to stalk a shrew, make a bee barn, to how to take amazing phone-camera snaps, or construct a woodlouse maze out of Lego, this book is packed full of amazing nature activities for every day of the year. Also find out- Who kept a pocket full of toads, how best to watch woodlouse drinking through their bottoms, who is famous for eating bowls of slug stew, where to find the best live nature webcams and much, much more.

Making Sense of Nature

Today, we don't get nearly enough play in our lives. At school, kids are drilled on exams, while at home we're all glued to our phones and screens. Former children's

laureate and bestselling author, Michael Rosen, is here to show us how to put this right - and why it matters so much for creativity, resilience and much more. Packed with silliness, activities and prompts for creative indoor and outdoor play for all ages - with specially illustrated pages for everything from doodling to word play and after-dinner games.

Bird Species

A close look at one season in one key site that reveals the amazing science and magic of spring bird migration, and the perils of human encroachment. Every spring, billions of birds sweep north, driven by ancient instincts to return to their breeding grounds. This vast parade often goes unnoticed, except in a few places where these small travelers concentrate in large numbers. One such place is along Lake Erie in northwestern Ohio. There, the peak of spring migration is so spectacular that it attracts bird watchers from around the globe, culminating in one of the world's biggest birding festivals. Millions of winged migrants pass through the region, some traveling thousands of miles, performing epic feats of endurance and navigating with stunning accuracy. Now climate change threatens to disrupt patterns of migration and the delicate balance between birds, seasons, and habitats. But wind farms--popular as green energy sources--can be disastrous for birds if built in the wrong places. This is a fascinating and urgent study of the complex issues that affect bird migration.

Biodiversity and Health in the Face of Climate Change

Illustrated instructions for 365 outdoor activities for young people to discover, observe, explore, and create.

RSPB Nature Guide: Birds

In the exemplary Jane Bull style, *Stitch-by-Stitch* serves up a collection of exciting new projects and provides a great introduction to the traditional needlecrafts and useful sewing skills of yesteryear. The eBook covers all the essential subjects - from embroidery, needlepoint, and knitting, to crochet, appliqué, patchwork, and dressmaking - and brings them right up-to-date with lots of fresh new ideas. Children learn the basics, from threading a needle through to measuring fabric and sewing a seam. They create their sewing box before being introduced to all the core kit, tools, and equipment. *Stitch-by-Stitch* reveals what to use, when, and how, and introduces the idea of recycling (or "upcycling") old clothes and home furnishings. The essential stitches are clearly illustrated and all of the techniques are clearly and properly explained. The projects provide a fun way for children to build up their textile skills and produce some fantastic textile pieces, including patchwork quilts, pocket purses, shoulder bags, embroidered pictures, trinket boxes, and many more exciting items that make perfect presents or great things to

keep. The section on trimmings and embellishments provides the perfect finish for the book, complete with plenty of creative ideas for things to do with ribbons, tassels, pom-poms, beads, and buttons.

Bird-Friendly Building Design

#1 NEW YORK TIMES BESTSELLER * "The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon."--Andrew Solomon, author of *The Noonday Demon* With a new afterword It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible--food shortages, refugee emergencies, climate wars and economic devastation. An "epoch-defining book" (The Guardian) and "this generation's *Silent Spring*" (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it--the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation--today's. Praise for *The Uninhabitable Earth* "The Uninhabitable Earth is the most terrifying book I have

ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet."--Farhad Manjoo, The New York Times "Riveting. . . . Some readers will find Mr. Wallace-Wells's outline of possible futures alarmist. He is indeed alarmed. You should be, too."--The Economist "Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the 'eerily banal language of climatology' in favor of lush, rolling prose."--Jennifer Szalai, The New York Times "The book has potential to be this generation's Silent Spring."--The Washington Post "The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book."--Alan Weisman, The New York Review of Books

Michael Rosen's Book of Play

An in-depth critical read of 'Metal Gear Rising: Revengeance'. Looking at the game in detail, author Heather Alexandra explores the themes of violence, the soul, and authenticity in PlatinumGames's 2013 hack and slash addition to the Metal Gear franchise. This is an EPUB file. A formatted PDF version of the book is also available on the creator's page.

Animalphabet

As a mother, a wife, and a businesswoman, Kaia Roman always had a plan. But when her biggest plan, the business she cofounded, collapsed, Kaia found herself crushed by depression. And what felt even worse was that, with a husband and two kids relying on her to get out of bed, she didn't have a plan to move forward. Determined to turn her life around and put her ingrained habits of stress and anxiety behind her, Kaia decided to put everything else on hold and dedicate thirty days to the singular pursuit of joy. The results were astonishing-and lasted much longer than the initial monthlong project. In this uplifting and eye-opening memoir, Kaia uses her business savvy to create a concrete Joy Plan to get back on her feet fast. Using scientific research on hormones, neurotransmitters, and mindfulness, along with the daily dedication to creating a more joyful existence, Kaia teaches readers how to move past temporary happiness and succeed in creating joy that lasts. Complete with advice, exercises, and key takeaways, The Joy Plan is Kaia's step-by-step guide to how she, and everyone else, can ditch the negative and plan for the joy in their lives.

The Wild Weather Book

View the animal kingdom up close as never before in this breathtaking title, which

has already sold over 1.5 million copies. Written by 70 specialists, it features stunning wildlife photography of more than 2000 of the world's most important wild mammals, birds, reptiles, amphibians, and insects. With around two million species identified to date, animals are the dominant and most varied form of life on the planet. Animal presents a representative selection, ranging from the giant baleen whale, to fast-moving predators such as sharks, big cats, and birds of prey, as well as microscopic beetles barely 1mm long and other insects. It presents some of the latest species to be described: meet the cute but elusive olinguito from South America, which was only identified in 2013, or the skywalker hoolock gibbon that was named after a Star Wars character in 2017. Animal also explains how the earth's biodiversity is in sharp decline and the conservation projects underway to safeguard precious species. For each one, it gives a locator map and statistics, including its conservation status. For anyone who wants a reliable and enthralling reference, in which you can find the answers to everything - from why zebras are striped or how the sunbear got its name - Animal is your essential one-stop guide.

The Fen Management Handbook

An astonishing, evocative exploration of the natural world and all its wonders, by 15-year-old conservationist and rising literary star Dara McAnulty

Recycle and Remake

DIV Fiona Danks and Jo Schofield are back with more wonderful ideas for fun outdoors even in the most challenging weather! Imagine - jumping in the biggest puddle you can find! - Or running barefoot and feeling squidgy mud ooze up between your toes! - Or run up the nearest hill to feel the wind try to carry you away! When it's wet, or windy or cold, there's no need to stay cooped up indoors; it's a great opportunity to rush outside for some fun. - Go on an animal hunt and find the creatures that come out in the wet. - Fly a kite in the wind and catch falling leaves. - Take your camera into a white world and see how many different icy patterns and shapes you can find. There are loads of exciting and creative things you can do in the natural world when the weather's wild. So don't wait for the sun: take this book with you and go outdoors for a wild weather adventure! /div

Flexibility in the Migration Strategies of Animals

Conservation Biology in Sub-Saharan Africa comprehensively explores the challenges and potential solutions to key conservation issues in Sub-Saharan Africa. Easy to read, this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics, including threats to biodiversity, environmental laws, and protected areas management, as well as related topics

such as sustainability, poverty, and human-wildlife conflict. This rich resource also includes a background discussion of what conservation biology is, a wide range of theoretical approaches to the subject, and concrete examples of conservation practice in specific African contexts. Strategies are outlined to protect biodiversity whilst promoting economic development in the region. Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter, together with recommended readings and suggested discussion topics. Each chapter also includes an extensive bibliography. Conservation Biology in Sub-Saharan Africa provides the most up-to-date study in the field. It is an essential resource, available on-line without charge, for undergraduate and graduate students, as well as a handy guide for professionals working to stop the rapid loss of biodiversity in Sub-Saharan Africa and elsewhere.

Animal

Get outdoors and explore nature with a new activity every day of the year Watch shooting stars, build a frog house, or cook using the sun! With RSPB 365 Outdoor Activities You Have To Try! you'll find an incredible 365 outdoor pursuits to keep your little ones occupied all year long. Produced in association with the RSPB, Europe's leading wildlife charity. From easy-to-do garden projects to more ambitious building projects, there's an activity for all interests and abilities. You'll only need readily available materials such as paper, sand, or soil to complete

projects. Plus, clear step-by-step instructions and photos show you what to do every step of the way. Wherever you are in the world, use whatever's at your doorstep and get the whole family exploring nature together. Or encourage your child to observe and interact with nature on their own with RSPB 365 Outdoor Activities You Have To Try!

A First Book of Nature

The Kids' Nature Book

Kids are on a mission to save the Earth! Recycle and Remake is the hands-on, practical guide they need to get started. This gentle, but empowering book is full of creative making activities, information, and ideas that give young eco-warriors the know-how to really help the environment. With Recycle and Remake, kids will soon be saving trees by making their own seeded recycled paper from junk mail, cleaning up the oceans by turning old shopping bags into kites, friendship bracelets, and colorful woven baskets, and repurposing a cardboard box into a periscope. They'll also learn about sustainable energies by creating a simple solar oven, cutting down on plastic wrap by making a food wrap from scrap cotton and beeswax, and turning an old tee shirt into a reusable tote bag. They can even grow

new plants to clean the air in their own upcycled milk bottle planters and using homemade compost. As kids make and create, they will learn kid-friendly facts about the big issues our planet is facing. Each of the activities directly relates to an environmental hot topic, such as plastic pollution, food waste, or deforestation. Budding environmentalists all over the world are feeling inspired to do their part for our amazing planet. This future-friendly book is here to guide them with all the information, ideas, tips, and tools they need to be part of the solution.

The Sound Book: The Science of the Sonic Wonders of the World

The ideal portable companion, the world-renowned Collins Gem series returns with a fresh new look and updated material.

Bill Bailey's Remarkable Guide to British Birds

A primer on the elements and art of garden architecture explains how to plan and construct a garden to suit any taste, focusing on such key elements as fences, walls, walkways, paths, sheds, lighting, water features, and outdoor artwork.

Great Things to Do Outside

2019 Nature Month-By-Month

A humorous and very personal guide written by Bill Bailey about his favourite British birds, complete with drawings, notes and cartoons by the comedian himself. 'When herons are spooked they have a habit of vomiting as a defence. Half-digested pieces of eel and water vole skull on your head is not a good look. Just so you know.' Bill Bailey's wonderfully charming and informative book on the birds he loves is now available as a handy, easy-to-carry pocket paperback. Packed with the comedian's observations, illustrations and sketches, this edition is perfect for birdwatching expeditions, with new information for proper twitchers, including: · A 'British Birds' checklist · A list of the best birdwatching sites in the UK · Suggestions of bird spotting equipment · Information about joining a birdwatching club Bailey takes us on a journey around the British Isles, zooming in on those birds that enthuse him the most. Whether it's what they eat, where they fly to or how they communicate, these birds are always fascinating, and he introduces us to their weird and wonderful ways in a manner that is always entertaining. If you're a parent who'd like to appear a bit clever when your child asks you the name of a bird; if you want to find a new and healthy hobby that takes you outdoors; or whether, quite simply, you want to understand a bit more about our natural environment and have a laugh at the same time, this is the companion book to

have. Funny and insightful, and positively crackling with energy, knowledge and wit, this beautiful paperback will delight Bailey's fans, birds as well as those who fancy a bit of armchair escapism. Alongside music and stand-up, one of Bailey's favourite pastimes is birdwatching, which he has been doing since he was a child in the West Country. His fondest memories are of family outings with parents, grandparents and cousins, ticking the birds off in his little Observer's Book of Birds. As he has said about those formative years, 'birdwatching gave a purpose to the day and a love of the natural world which has carried on into my adult life'.

It's Complicated

Jake McGowan-Lowe is a boy with a very unusual hobby. Since the age of 7, he has been photographing and blogging about his incredible finds and now has a worldwide following, including 100,000 visitors from the US and Canada. Follow Jake as he explores the animal world through this new 64-page book. He takes you on a world wide journey of his own collection, and introduces you to other amazing animals from the four corners of the globe. Find out what a cow's tooth, a rabbit's rib and a duck's quack look like and much, much more besides.

My First Book of Garden Birds

With attractive, child-friendly illustrations and simple, accessible and informative text, this title provides an ideal introduction to the 20 most common British garden birds.

Wild Things to Do with Woodlice

First published in 1956, *Swifts in a Tower* still offers astonishing insights into the private lives of swifts, their lifestyles, and the environment they inhabit. Now more than sixty years later, swifts have been studied even more thoroughly, using technology unimaginable in the 1950s. This research has revealed more secrets of these indomitable flyers, which spend virtually their entire lives in flight, and so this new edition, edited by the author's son Andrew Lack and published in association with the Royal Society for the Protection of Birds for their Oxford Swift City project, includes a brand-new chapter by Andrew Lack that updates the story of this remarkable bird for the twenty-first century.

The Snail and the Whale Make and Do

365 inspirational suggestions for enjoying nature. These 'Random Acts of Wildness' will encourage you to fall in love with, learn about or even help wildlife and wild places near you.

Jake's Bones

Have fun and stay busy anytime and anywhere with loads of games, quizzes, challenges, and activities. Even though real life is filled with plenty of action, sometimes you find yourself sitting through a never-ending car ride, waiting on a long line, or with a couple hours with nothing planned. This book is perfect for those times when you don't have anything to do. It's jam packed with witty jokes, mind-boggling puzzles and challenges, wacky ideas, silly questions, fun quizzes, and interesting lists. With more than a hundred different activities, it's guaranteed to keep you amused for ages! The Anti-Boredom Book of Brilliant Things to Do is divided into various themes with lots of different things to do for each one. There are creative activities, items to choose and score, riddles to solve, games, and loads of funny stuff! Some of those things include: Design an awesome, one-of-a-kind sandwich "Would you rather?" sports questions Create some crazy names for an imaginary friend Learn some cool slang for "money" List the craziest pets you can imagine Rate popular music genres Trivia about classic movies and TV shows Write your own school report Quiz to choose your dream job How to say "cell phone" in eleven different languages And more! So, sharpen up your imagination, prepare to have a laugh, gather your friends and family, and get ready to never be bored again!

365 Days Wild

Do you know that cormorants are expert fishers? They swim along the water and then quickly dive to catch their prey! Or that great crested grebes fluff up their feathers and break out into a dance to attract their mates? From the easy-to-spot, year-round tufted duck to the summer visitor and cackling fulmar, get ready to find out about 137 different birds. There are so many feathered friends to meet in this children's spotter's field guide, published in collaboration with the RSPB, the largest wildlife conservation charity in Europe. You will learn where to find birds, what different bird habitats look like and which birds to look out for throughout different seasons. Including our favourite birds, such as the goldfinch, robin, blue tit, blackbird and even owl, as well as some less common visitors we might not know of, each page contains information boxes about each bird. With beautiful illustrations by Kate McLelland throughout, this is the perfect contemporary pocket guide for young birdwatchers in-the-making and adult nature enthusiasts alike.

A Season on the Wind

“A lucid and passionate case for a more mindful way of listening. . . . Anyone who has ever clapped, hollered or yodeled at an echo will delight in [Cox’s] zestful curiosity.”—New York Times Trevor Cox is on a hunt for the sonic wonders of the

world. A renowned expert who engineers classrooms and concert halls, Cox has made a career of eradicating bizarre and unwanted sounds. But after an epiphany in the London sewers, Cox now revels in exotic noises—creaking glaciers, whispering galleries, stalactite organs, musical roads, humming dunes, seals that sound like alien angels, and a Mayan pyramid that chirps like a bird. With forays into archaeology, neuroscience, biology, and design, Cox explains how sound is made and altered by the environment, how our body reacts to peculiar noises, and how these mysterious wonders illuminate sound's surprising dynamics in everyday settings—from your bedroom to the opera house. The Sound Book encourages us to become better listeners in a world dominated by the visual and to open our ears to the glorious cacophony all around us.

The Joy Plan

Winner of the 2018 Chen Bochui International Children's Literature Award for Best Picture Book of the Year A hugely entertaining animal ABC guessing game with stunning peep-through pages and fold-out flaps, by bestselling author Julia Donaldson and award-winning illustrator Sharon King-Chai. Now available in paperback. Can you guess who has more legs than a butterfly? And who is wrinklier than a hedgehog? Each page draws you further into a beautifully vibrant world of huge elephants, slithery snakes and growling tigers, inviting you to compare one animal to another and learn comparison words and adjectives from the natural

world. With vivid, eye-catching artwork and an exotic array of animals to marvel over, Animalphabet is a gorgeous book to treasure and read over and over again.
