A study of one of the most decisive stages in Wales' development. In the 16th century the Roman Church was ousted from Wales and replaced by a state-established church. This is the story of how the ensuing Reformation dramatically influenced Welsh religious, literary and intellectual history.

Communication and Commerce Along the Western Seaways AD 400-800

Cutting through the mists of Celtic myth, this historical account introduces the saints to us as real men and women in pursuit of holiness. The Celtic period began in 435 and ended in 715; this work tells the stories of the various branches of the Celtic church in this period.

The Archaeology of Islands

Drawing on a variety of sources, this very readable narrative deals with three major and closely interrelated themes: first, the existence of the Isles and coastal mainland as a kingdom from c.1100 to 1266; second, the rulers of the region, Somerled and his descendants, the MacDougalls, MacDonalads, and MacRuairis; and third, the often complex relations among the Isles, Scotland, Norway and England.

Who are the Celtic Saints?

Manx Kingship in Its Irish Sea Setting, 1187-1229

Covering the period AD 350-950, this book by three distinguished French scholars examines why and how, in Late Antiquity and the early Dark Ages, Britons from the Roman province of Britannia went over to Armorica, part of ancient Gaul, and settled there.

Isle of the Saints

An examination of the assumption that there were extensive trade links along the western coasts of the British Isles. Particular attention is focussed on the links between Britain and Ireland, Gaul and beyond. Wooding argues that the links were

sporadic and small scale. Full use is made of archaeological and textual sources. Details of routes, cargoes, links with Gaul and the Mediterranean and sites like Whithorn and Tintagel.

Geschichte und Kultur der Kelten

Lives of the Welsh Saints

This study presents Andrew David's field survey and excavation, including the results of excavations at the Nab Head and Daylight Rock in Pembrokeshire. It integrates these results with existing data to reappraise the chronology of Palaeolithic and Mesolithic settlement in Wales identifying phases of cultural transition.

For over forty years, King Ragnvald Godredsson of Man and the Isles was a power to be reckoned with in the seas between Britain and Ireland. This book explores Ragnvald's reign within the framework of the dynasty to which he belonged (the Crovan dynasty) and the ultra-competitive arena of the Irish Sea basin in the decades around 1200.

Saints' Cults in the Celtic World

Archaeologists have traditionally considered islands as distinct physical and social entities. In this book, Paul Rainbird discusses the historical construction of this characterization and questions the basis for such an understanding of island archaeology. Through a series of case studies of prehistoric archaeology in the Mediterranean, Pacific, Baltic, and Atlantic seas and oceans, he argues for a decentering of the land in favor of an emphasis on the archaeology of the sea and, ultimately, a new perspective on the making of maritime communities. The archaeology of islands is thus unshackled from approaches that highlight boundedness and isolation, and replaced with a new set of principles - that boundaries are fuzzy, islanders are distinctive in their expectation of contacts with people from over the seas, and that island life can tell us much about maritime communities. Debating islands, thus, brings to the fore issues of identity and community and a concern with Western construction of other peoples.

St David of Wales

St. David's and Dewisland

The typical image of Dark Age Britain is that after the Romans left, people basically twiddled their thumbs and illuminated some manuscripts until the Anglo-Saxons admitted them back into history and the world. Not so, says Dark. He has directed

and reported on many excavations of his own, but here he draws on other archaeological, historical, and literary studies to argue that the political structures of the late Roman period persevered to become those of the Middle Ages. Palaeolithic and Mesolithic Settlement in Wales

In the 'Age of the Saints' between the fifth and seventh centuries, early Christian leaders in Wales assimilated the currents of existing faith and indigenous Celtic devotion into the intellectual traditions of the greater European church. The humanist teaching of such figures as 'papa' Dubricius (Dyfrig) in Erging, and of his successor Iltut (Illtud) in Llantwit Major, were followed by the sixth-century saints who turned increasingly to an ascetic monasticism influenced by ideas originating in the eastern Mediterranean. Although the idea of a Celtic Church encompassing the Celtic nations has now been superseded in our understanding of the period, the lives of the saints are squarely set against the backdrop of the lands of their mission. The lives represent medieval Latin scripts in eulogy to the religious leaders of earlier centuries, though rarely achieving great literary invention around only kernels of truth that relate to the individual saints, and should correctly be viewed as embodying a literary form in their own right. This is a newly available edition of G. H Doble's *Lives of the Welsh Saints*, which was edited by Professor D. Simon Evans in 1984. This volume contains his work on five Welsh Saints - Dubricius, Iltut, Paulinus, Teilo and Oudoceus.
