Behavior Disorders in School-aged Children

The silver-and-black-clad Oakland Raiders fans are the most notorious in American professional sports, with a mythic reputation for cursing, drinking, brawling, and generally wreaking mayhem. The devotion of the team's multiracial, largely blue-collar supporters runs deep, creating a profound sense of community. As Jim Miller and Kelly Mayhew reveal in this hair-raising and entertaining new book, the self-described Raider Nation, smitten with its outlaw mystique, provides a gritty alternative to California's sunshine-and-granola image. Over the course of the harrowing 2003 season, Miller and Mayhew explored the reality behind the myth and interviewed legions of rabid Raiders fans—from suburban families to bikers—while attending games in the “Black Hole” (the rowdiest section in Oakland's stadium), frequenting sports bars, and crashing tailgate parties. Featuring the extraordinary photography of Joseph A. Blum, *Better to Reign in Hell* is both a rollicking tale of obsessive fandom and a fascinating study of the intersection of class, race, gender, and community in professional sports.

Communicating Christ to the World

New York Post Best Book of 2016 We often think of our capacity to experience the suffering of others as the ultimate source of goodness. Many of our wisest policy-

Get Free Seduce Emotional Contagion

makers, activists, scientists, and philosophers agree that the only problem with empathy is that we don't have enough of it. Nothing could be farther from the truth, argues Yale researcher Paul Bloom. In *AGAINST EMPATHY*, Bloom reveals empathy to be one of the leading motivators of inequality and immorality in society. Far from helping us to improve the lives of others, empathy is a capricious and irrational emotion that appeals to our narrow prejudices. It muddles our judgment and, ironically, often leads to cruelty. We are at our best when we are smart enough not to rely on it, but to draw instead upon a more distanced compassion. Basing his argument on groundbreaking scientific findings, Bloom makes the case that some of the worst decisions made by individuals and nations—who to give money to, when to go to war, how to respond to climate change, and who to imprison—are too often motivated by honest, yet misplaced, emotions. With precision and wit, he demonstrates how empathy distorts our judgment in every aspect of our lives, from philanthropy and charity to the justice system; from medical care and education to parenting and marriage. Without empathy, Bloom insists, our decisions would be clearer, fairer, and—yes—ultimately more moral. Brilliantly argued, urgent and humane, *AGAINST EMPATHY* shows us that, when it comes to both major policy decisions and the choices we make in our everyday lives, limiting our impulse toward empathy is often the most compassionate choice we can make.

A.B.C.'s of Behavioral Forensics

Get Free Seduce Emotional Contagion

In this book Anne Maguire examines the psychoanalytic relevance of evil. Using case studies and examples she examines how sin may find calamitous expression, and the consequences which can flow from its covert pre-existence. Pride, anger, jealousy, sloth, lust, avarice and gluttony are as old as mankind itself. However, in the sense in which they were originally understood, interest in the seven sins has withered with the elapse of time. Today, ideas about sin and evil as taught by the theologians of the early church seem dated and alien. However, when thought of as psychic representations of the dark side of human nature, as C.G. Jung defined it, the Seven Deadly Sins acquire relevant new meaning.

The Neuroses

Nonverbal Communication

Eighteenth-century British culture was transfixed by the threat of contagion, believing that everyday elements of the surrounding world could transmit deadly maladies from one body to the next. Physicians and medical writers warned of noxious matter circulating through air, bodily fluids, paper, and other materials, while philosophers worried that agitating passions could spread via certain kinds of writing and expression. Eighteenth-century poets and novelists thus had to grapple

Get Free Seduce Emotional Contagion

with the disturbing idea that literary texts might be doubly infectious, communicating dangerous passions and matter both in and on their contaminated pages. In *Reading Contagion*, Annika Mann argues that the fear of infected books energized aesthetic and political debates about the power of reading, which could alter individual and social bodies by connecting people of all sorts in dangerous ways through print. Daniel Defoe, Alexander Pope, Tobias Smollett, William Blake, and Mary Shelley ruminate on the potential of textual objects to absorb and transmit contagions with a combination of excitement and dread. This book vividly documents this cultural anxiety while explaining how writers at once reveled in the possibility that reading could transform the world while fearing its ability to infect and destroy.

Understanding Emotion at Work

Based on years of case-study research and up-to-date scholarship, this book shows how business managers can benefit from a better understanding of the connection between emotion and intelligence and better deal with issues of sexuality and workplace relationships. In most organizations the vast majority of employees feel that management has failed to deal effectively with issues of sexuality and intimacy in the workplace. Yet personal relationships can profoundly affect productivity, morale and the well-being of employees. In this brilliant book, author Rory Ridley-Duff proposes a new framework for appreciating both potential

Get Free Seduce Emotional Contagion

benefits and harms of workplace relationships, and a new, constructive and non-confrontational approach to sexual relations in the workplace. Emotion, Seduction & Intimacy is a 'must read' for anyone concerned about the role of intimacy and close relationships in day-to-day life. Praise for Emotion, Seduction and Intimacy: "Rory's work is insightful and introduces the concepts of gender and intimacy to the subject of enterprise governance." Professor Phil Johnson, Head of HRM and Organisational Behaviour, Sheffield University "Rory is a man who does not shun the moral maze of human desires and passions but brings greater understanding to that very facet of life - the forbidden fruit that made us fall from grace and its role in our emancipation." Dr Poonam Thapa, Gender, Culture and Sexual Health Expert "Rory eloquently straddles the world of practitioner and academic: his writing is engaging and constantly draws the reader into the web of everyday emotions found bubbling away under the surface in the workplace. Sexual interplay, power and vengeance are played out on the pages - beats Dan Brown hands down " - Dr Sally East, Specialist on Work-Life Balance, Royal Veterinary College "Rory's book has a magnificent tone - serious, high level addressing of issues of both organisational and theoretical importance. For me it is one of the very best studies I have read." - David Megginson, Emeritus Professor of Human Resource Development, Sheffield Hallam University

Traumatic Relationships and Serious Mental Disorders

Descartes' Error

Creative Interviewing is the follow-up to Douglas' successful book Investigating Social Research (SAGE 1976). Using new research, Douglas reconsiders one of the social researcher's most widely used tools -- interviewing. Moving away from more traditional interviewing techniques, he develops a methodology that works with, instead of against, the situational factors involved. By becoming more flexible in their approach and response, creative interviewers increase their chances of discovering the truth. The book is written in an absorbing and lively style, with many illustrative case studies.

The Routledge Handbook of Attachment: Assessment

Get practical insights on the psychology of white-collar criminals—and how to outsmart them Understand how the psychologies of fraudsters and their victims interact as well as what makes auditors/investigators/regulators let down their guard. Learn about the psychology of fraud victims, including boards of directors and senior management, and what makes them want to believe fraudsters, and therefore making them particularly vulnerable to deception. Just as IT experts gave us computer forensics, we now have a uniquely qualified team immersed in psychology, sociology, psychiatry as well as accounting and auditing, introducing

Get Free Seduce Emotional Contagion

the emerging field of behavioral forensics to address the phenomenon of fraud. Ever wonder what makes a white-collar criminal tick? Why does she or he do what they do? For the first time ever, see the mind of the fraudster laid bare, including their sometimes twisted rationalizations; think like a crook to catch a crook! The A.B.C.'s of Behavioral Forensics takes you there, with expert advice from a diverse but highly specialized authoring team of professionals (three out of the four are Certified Fraud Examiners): a former accounting firm partner who has a PhD in psychology, a former FBI special agent who has been with investigative practices of two of the Big Four firms, an industrial psychiatrist who has worked closely with the C-level suite of large and small companies, and an accounting professor who has interviewed numerous convicted felons. Along with a fascinating exploration of what makes people fall for the common and not-so-common swindles, the book provides a sweeping characterization of the ecology of fraud using The A.B.C.'s of Behavioral Forensics paradigm: the bad Apple (rogue executive), the bad Bushel (groups that collude and behave like gangs), and the bad Crop (representing organization-wide or even societally-sanctioned cultures that are toxic and corrosive). The book will make you take a longer look when hiring new employees and offers a deeper more complex understanding of what happens in organizations and in their people. The A.B.C. model will also help those inside and outside organizations inoculate against fraud and make you reflect on instilling the core values of your organization among your people and create a culture of excellence and integrity that acts as a prophylactic against fraud. Ultimately, you will discover

Get Free Seduce Emotional Contagion

that, used wisely, behavioral methods trump solely economic incentives. With business fraud on the rise globally, *The A.B.C.'s of Behavioral Forensics* is the must-have book for investigators, auditors, the C-suite and risk management professionals, the boards of directors, regulators, and HR professionals. Examines the psychology of fraud in a practical way, relating it to aspects of fraud prevention, deterrence, detection, and remediation Helps you understand that trust violation—the essence of fraud—is a betrayal of behavioral assumptions about "trusted" people Explains how good people go bad and how otherwise honest people cross the line Underscores the importance of creating a culture of excellence and integrity that inoculates an organization from fraud risk (i.e., honest behavior pays, while dishonesty is frowned upon) Provides key takeaways on what to look for when hiring new employees and in your current employees, as well as creating and maintaining a culture of control consciousness Includes narrative accounts of interviews with convicted white-collar criminals, as well as interpretive insights and analysis of their rationalizations Furnishes ideas about how to enhance professional skepticism, how to resist fraudsters, how to see through their schemes, how to infuse internal controls with the people/behavioral element, and make them more effective in addressing behav

Talent Is Overrated

When people are in a certain mood, whether elated or depressed, that mood is

Get Free Seduce Emotional Contagion

often communicated to others. When we are talking to someone who is depressed it may make us feel depressed, whereas if we talk to someone who is feeling self-confident and buoyant we are likely to feel good about ourselves. This phenomenon, known as emotional contagion, is identified here, and compelling evidence for its effects is offered from a variety of disciplines--social and developmental psychology, history, cross-cultural psychology, experimental psychology, and psychopathology. The authors propose a simple mechanism to account for the process of contagion. They argue that people, in their everyday encounters, tend automatically and continuously to synchronize with the facial expressions, voices, postures, movements, and instrumental emotional behaviors of others. Emotional experiences are affected, moment-to-moment, by the feedback from such mimicry. In a series of orderly chapters, the authors provide observational and laboratory evidence to support their propositions. They then offer practical suggestions for clinical psychologists, physicians, husbands and wives, parents, and professionals who wish to become better at shaping the emotional tone of social encounters.

Interpersonal Communication Through the Life Span

Get Free Seduce Emotional Contagion

Seduction and Romantic DinnerYour Mystic Epicurean Quest iCookbookFrom the Columns of Paideia comes the most anticipated tome in years. Gain knowledge of epicurean recipes, artistic seduction rituals, and an impetus system of beliefs. The great wisdom of the Columns of Paideia will be a mystery to you no longer! You will also elicit knowledge from the Round Rose Table's legendary participants. By means of the "VII Columns of Knowledge," you're literally bestowed the keys to the seduction and romantic dinner kingdom way of life. You will gain knowledge of secret, seductive recipes and mysterious, uplifting effects to make you more desirable and playful. Discover how we keep our relationships lively and enchanting! Your lover will think you are an epicurean god or goddess who has arrived to mysteriously give them a tantalizing culinary feast. Everybody desires someone who can step outside of his or her box and is mysterious enough to move their inner passion. They want someone who can take them in, slowly tease, intrigue them, entice their emotions, and make them experience novel thoughts and utter feelings that they would have never experienced before or thought they would ever experience. Smidgens, dash, pinch, are all jargon terms that reflect the way people cook and dine. These words describe the way you should sprinkle the seduction and romantic dinners into your life for that special someone. With this new knowledge, you will enhance your mastery of epicurean enticement, gain a greater understanding of human psychology, and learn poetic dynamics-this will, in turn, increase social interaction. Bear in mind, seduction is really about interconnecting in a new potent way that makes you (and your beliefs) irresistible

to others. <http://www.seductionandromanticdinner.com>

Better to Reign in Hell

Many books have been written for those suffering from depression, but what if you're suffering because someone you love is depressed? Research shows that if you are close to a depressed person, you are at a much higher risk of developing problems yourself, including anxiety, phobias, and even a kind of contagious depression. In this authoritative and compassionate book, psychologists Laura Epstein Rosen and Javier Francisco Amador explain the mechanisms of depression that can cause communication breakdown, increase hostility, and ultimately destroy relationships. Through compelling real-life stories and step-by-step advice, the authors teach concrete methods that you and your loved one can use to protect yourselves and your relationship from depression's impact. Drawing on their own innovative research, they give sensitive guidance about how to recognize your needs, how to provide the best kind of support, and how to encourage the depressed person to seek treatment. Whether you are the partner, parent, friend, or child of a depressed person, you'll find this book and invaluable companion in your journey back to health.

The Female Brain

Intercultural Mirrors

Neuroscientific research on emotion has developed dramatically over the past decade. The cognitive neuroscience of human emotion, which has emerged as the new and thriving area of 'affective neuroscience', is rapidly rendering existing overviews of the field obsolete. This handbook provides a comprehensive, up-to-date and authoritative survey of knowledge and topics investigated in this cutting-edge field. It covers a range of topics, from face and voice perception to pain and music, as well as social behaviors and decision making. The book considers and interrogates multiple research methods, among them brain imaging and physiology measurements, as well as methods used to evaluate behavior and genetics. Editors Jorge Armony and Patrik Vuilleumier have enlisted well-known and active researchers from more than twenty institutions across three continents, bringing geographic as well as methodological breadth to the collection. This timely volume will become a key reference work for researchers and students in the growing field of neuroscience.

Emotional Contagion

Get Free Seduce Emotional Contagion

Presents course concepts from a life span orientation so that students can gain an understanding of how life stages and life conditions impact communication in interpersonal relationships. Section Two of this text is organised around four specific life stages: early to middle childhood.

The Journal of the Law Society of Scotland

The Crowd

Seduction and Romantic Dinner - Your Mystic Epicurean Quest - Icookbook

Drawing significantly on both classic and contemporary research, *Nonverbal Communication* speaks to today's students with modern examples that illustrate nonverbal communication in their lived experiences. This new edition, authored by three of the foremost scholars in nonverbal communication, builds on the approach pioneered by Burgoon, Buller and Woodall which focused on both the features and the functions that comprise the nonverbal signaling system. Grounded in the latest multidisciplinary research and theory, *Nonverbal Communication* strives to remain

very practical, providing both information and application to aid in comprehension.

When Someone You Love is Depressed

Exploration of the nature of human communication and the media is a pre requisite to any assessment of the likely future role of communications . . . We cannot assume that the nature of these things is transparently obvious to everyone and therefore commonly understood. Three developments in recent decades should adequately warn against such an assumption. First, we had the fiasco of social scientists trying to apply Shannon's mathematical theory of information as if it were a theory of human communication. 'In Shannon's use of information we cannot speak of how much information a person has only how much a message has. ' (Ackoff and Emery, 1972, p. 145). They would not have wandered into that blind alley if they had stopped to think about the nature of human communication. Second was the belated but wholehearted acceptance of the Heider theory of balance and its subsequent wane. Its wane had nothing to do with its inherent merits. It waned because it could not survive on the Procrustean bed of the psychologists' theory of choice. It did not occur to the psychologists to question their assumptions about how people made the choices that lead to purposeful communication (Ackoff and Emery, 1972, p. 58). The last example has been the bitter and unended furore about McLuhan. This time the psychologists and sociologists have been strangely quiet but we can be sure this does not imply acquiescence in

McLuhan's views.

Creative Interviewing

Seven Deadly Sins

Behavior Disorders in Children

Sur l'eau. La vie errante. A family affair, and other stories

In *Intercultural Mirrors: Dynamic Reconstruction of Identity*, the authors suggest that the view of us held by culturally different people provides an essential key to self-understanding and identity remodelling. The book aims at analysing intercultural experiences on a deeper level.

The SAGE Encyclopedia of the Internet

The Routledge Handbook of Attachment: Assessment provides, in one volume, a

Get Free Seduce Emotional Contagion

detailed discussion of the formal measurement tools available to assess attachment across the age range, including with families. It contains comprehensive chapters on many attachment-based validated procedures for assessing parenting and evaluating risk, to enable professionals to decide what type of assessment is appropriate, who should conduct it and the usefulness of the results. The book provides a detailed account of assessment measures of attachment to enable practitioners at all levels (including academic research workers) to decide which assessment procedure will best meet their need. The chapters are written by those who developed these tools and by people closely associated with them, and advocate an evidence-based model of assessment to increase fairness and transparency for families. Providing a practical guide to the uses of attachment theory and research in professional practice with adults, children, parents and families, and a detailed account of all the current evidence-based tools that can be used in assessment, *The Routledge Handbook of Attachment: Assessment* is ideal for professionals and clinicians wishing to commission or undertake assessments of attachment, as well as academic research workers and students.

A choice of futures

Battle for the Free Mind

Examines modern critical theory, feminism, and psychoanalysis, and discusses the modern concept of sex roles and the political aspect of human sexuality.

Reading Contagion

Since Dr. Brizendine wrote *The Female Brain* ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they

Get Free Seduce Emotional Contagion

value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.

The Bookman

Emotion, Seduction and Intimacy

Since Descartes famously proclaimed, "I think, therefore I am," science has often overlooked emotions as the source of a person's true being. Even modern neuroscience has tended, until recently, to concentrate on the cognitive aspects of brain function, disregarding emotions. This attitude began to change with the

Get Free Seduce Emotional Contagion

publication of Descartes' Error in 1995. Antonio Damasio—"one of the world's leading neurologists" (The New York Times)—challenged traditional ideas about the connection between emotions and rationality. In this wondrously engaging book, Damasio takes the reader on a journey of scientific discovery through a series of case studies, demonstrating what many of us have long suspected: emotions are not a luxury, they are essential to rational thinking and to normal social behavior.

The Works of Guy de Maupassant : La vie errante. Allouma Toine; and other stories

What if everything you know about raw talent, hard work, and great performance is wrong? Few, if any, of the people around you are truly great at what they do. But why aren't they? Why don't they manage businesses like Jack Welch or Andy Grove, play golf like Tiger Woods or play the violin like Itzhak Perlman? Asked to explain why a few people truly excel, most of us offer one of two answers: hard work or a natural talent. However, scientific evidence doesn't support the notion that specific natural talents make great performers. In one of the most popular Fortune articles in years, Geoff Colvin offered new evidence that top performers in any field - from Tiger Woods and Winston Churchill to Warren Buffett and Jack Welch - are not determined by their inborn talents. Greatness doesn't come from DNA but from practice and perseverance honed over decades. And not just plain

Get Free Seduce Emotional Contagion

old hard work, but a very specific kind of work. The key is how you practice, how you analyze the results of your progress and learn from your mistakes, that enables you to achieve greatness. Now Colvin has expanded his article with much more scientific background and real-life examples. He shows that the skills of business - negotiating deals, evaluating financial statements, and all the rest - obey the principles that lead to greatness, so that anyone can get better at them with the right kind of effort. Even the hardest decisions and interactions can be systematically improved. This new mind-set, combined with Colvin's practical advice, will change the way you think about your job and career - and will inspire you to achieve more in all you do.

Seduction in Popular Culture, Psychology, and Philosophy

Mental, physical, or sexual abuse in close personal relationships commonly results in trauma that is very different from the trauma of accidents, illness, or war. Making creative use of attachment theory to explicate the multifaceted outcomes of trauma, this book provides a powerful conceptual framework and a concise, masterly review of a huge knowledge base. Encyclopedic in scope and scholarly in its up-to-the-minute survey of research findings.

The Cambridge Handbook of Human Affective Neuroscience

Get Free Seduce Emotional Contagion

Seduction is a complicated concept that is a part of the general human experience. Despite the prevalence of seduction in our personal lives as well as within popular culture, the concept has not been widely discussed and researched as an academic field. *Seduction in Popular Culture, Psychology, and Philosophy* explores the concept of seduction and the many ways it can be understood, either as a social and individual practice, a psychological trait, or a schema for manipulation. Taking a cross-disciplinary approach, this publication features research-based chapters relevant to sociologists, media professionals, psychologists, philosophers, advertising professionals, researchers, and graduate level students studying in related areas.

Contagion

The Internet needs no introduction, and its significance today can hardly be exaggerated. Today, more people are more connected technologically to one another than at any other time in human existence. For a large share of the world's people, the Internet, text messaging, and various other forms of digital social media such as Facebook have become thoroughly woven into the routines and rhythms of daily life. The Internet has transformed how we seek information, communicate, entertain ourselves, find partners, and, increasingly, it shapes our notions of identity and community. The *SAGE Encyclopedia of the Internet* addresses the many related topics pertaining to cyberspace, email, the World Wide

Get Free Seduce Emotional Contagion

Web, and social media. Entries will range from popular topics such as Alibaba and YouTube to important current controversies such as Net neutrality and cyberterrorism. The goal of the encyclopedia is to provide the most comprehensive collection of authoritative entries on the Internet available, written in a style accessible to academic and non-academic audiences alike.

Human Behavior in Military Contexts

Seduction

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by

Get Free Seduce Emotional Contagion

which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. The Art of Seduction is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the internationally bestselling author of The 48 Laws of Power, Mastery, and The 33 Strategies Of War.

James Herbert

Getting to the heart of what binds and breaks organizations: emotion, Stephen Fineman explores beyond the surface of work to the rich emotional life bubbling underneath, showing what employees and managers constantly deal with but are often ill-equipped to do so.

Annals of the New York Academy of Sciences

The Art Of Seduction

Get Free Seduce Emotional Contagion

Human behavior forms the nucleus of military effectiveness. Humans operating in the complex military system must possess the knowledge, skills, abilities, aptitudes, and temperament to perform their roles effectively in a reliable and predictable manner, and effective military management requires understanding of how these qualities can be best provided and assessed. Scientific research in this area is critical to understanding leadership, training and other personnel issues, social interactions and organizational structures within the military. The U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) asked the National Research Council to provide an agenda for basic behavioral and social research focused on applications in both the short and long-term. The committee responded by recommending six areas of research on the basis of their relevance, potential impact, and timeliness for military needs: intercultural competence; teams in complex environments; technology-based training; nonverbal behavior; emotion; and behavioral neurophysiology. The committee suggests doubling the current budget for basic research for the behavioral and social sciences across U.S. military research agencies. The additional funds can support approximately 40 new projects per year across the committee's recommended research areas. Human Behavior in Military Contexts includes committee reports and papers that demonstrate areas of stimulating, ongoing research in the behavioral and social sciences that can enrich the military's ability to recruit, train, and enhance the performance of its personnel, both organizationally and in its many roles in other cultures.
