And what about enabling trapped airline passengers to escape safely in an emergency? Product designers and engineers face myriad such questions every day. Failure to answer them correctly can result in product designs that lead to injury or even death due to use error. Historically, designers and engineers have searched for answers by sifting through complicated safety standards or obscure industry guidance documents. *Designing for Safe Use* is the first comprehensive source of safety-focused design principles for product developers working in any industry. Special book features include: Concise, illustrated descriptions of design principles Sample product designs that illustrate the book's guidelines and exemplify best practices Literature references for readers interested in learning more about specific hazards and protective measures Statistics on the number of injuries that have arisen in the past due to causes that might be eliminated by applying the principles in the book Despite its serious subject matter, the book's friendly tone, surprising anecdotes, bold visuals, and occasional attempts at dry humor will keep you interested in the art and science of making products safer. Brain Culture investigates the American obsession with the health of the brain. Davi Johnson Thornton looks at familiar messages, tracing how brain science and colorful brain images produced by scientific technologies are taken up and distributed in popular media. She tracks the message that, "you are your brain" across multiple contemporary contexts, analyzing its influence on child development, family life, education, and public policy. Don't rely on instincts alone. Hiring. Is. King. The lesson seems so basic. Yet time after time, good companies stumble and lose their stride — just when they were poised for rapid growth. Why? Because their leaders treated hiring as a tedious chore. They posted an ad hoc ad. Took the first person with the right skills. Hired for immediate needs, rather than future flourishing. In *Hire Smart from the Start*, Dave Carvajal distills lessons gained from 20 years in the trenches, building out and staffing two enormously successful Internet startups and helping firms like Tumblr, Buddy Media, and Shutterstock land the talent they need to reach their greatest potential. Whether you're a high-tech entrepreneur taking a startup public, or a food truck vendor with a concept that's taking off, this book offers a proven formula to help you: Find candidates whose values and working style fit your business Spot the 5 types of applicants you should never, ever hire Motivate "reach" candidates to leave their jobs and take a chance on your vision Develop meaningful incentives that make people stay And more Accelerate success: hire smart from the start. "Conjure Women is a sweeping story that brings the world of the South before and after the Civil War vividly to life. Spanning eras and generations, it tells of the lives of three unforgettable women: Miss May Belle, a wise healing woman; her precocious and observant daughter Rue, who is reluctant to follow in her mother's

footsteps as a midwife; and their master's daughter Varina. The secrets and bonds among these women and their community come to a head at the beginning of a war and at the birth of an accursed child, who sets the townspeople alight with fear and a spreading superstition that threatens their newly won, tenuous freedom."--Publisher's description.

Robyn Schneider, author of *Extraordinary Means* and *The Beginning of Everything*, delivers a sharply funny, romantic girl-meets-boy novel with a twist: boy-also-meets-girl's-ghost-brother. When one girl's best friend is her dead brother's ghost, romance can be tricky. Perfect for fans of John Green and Nicola Yoon. Rose Asher believes in ghosts. She should, since she has one for a best friend: Logan, her annoying, Netflix-addicted brother, who is forever stuck at fifteen. But Rose is growing up, and when an old friend moves back to Laguna Canyon and appears in her drama class, things get complicated. Jamie Aldridge is charming, confident, and a painful reminder of the life Rose has been missing out on since her brother's death. She watches as Jamie easily rejoins their former friends—a group of magnificently silly theater nerds—while avoiding her so intensely that it must be deliberate. Yet when the two of them unexpectedly cross paths, Rose learns that Jamie has a secret of his own, one that changes everything. Rose finds herself drawn back into her old life—and to Jamie. But she quickly starts to suspect that he isn't telling her the whole truth. All Rose knows is that it's becoming harder to choose between the boy who makes her feel alive and the brother she isn't ready to lose.

Product-Market Fit Analysis

The Complete Guide to Home Automation

In 2007, VC Marc Andreessen drew a very simple graphic that changed the way smart start-ups think about their mission. His graphic was a hand-drawn scribble made of two circles and three words: Product - Market - Fit. It was in his words: "Only thing that matters for a new start-up". At Bootstrap Marketing, we agree. Finding product-market fit is what separates successful and struggling start-ups. But how do you find that fit and, in our metric-driven world, how do you measure it? Using work done by product management experts Chris Sorensen and Matt Brocchini, Bootstrap has developed a quantitative approach that enables companies to assess and improve their product-market fit. Bootstrap's Product-Market Fit Analysis (PMF Analysis) can be your secret weapon to help get your product and messaging into that product-market fit zone, and keep you there-a step ahead of your competition. We have successfully employed this methodology

in our own Customer Discovery and Alignment Workshop and for our clients, and we hope that this guide will help you find similar success.

Ever wonder what is going on in a baby's brain? Or how you can best nurture a child's natural development? Or why exactly Bach is better than Mozart for babies? This book will explain why. No technical knowledge is necessary, as Shore makes recent neurological findings accessible to all those who come into contact with young children. Everything a baby experiences in his or her first five years is building the foundation of life's learning potential through the formation of neural

networks in the brain. Through increasing the complexity of the early childhood environment in developmentally appropriate ways, we can nurture these neural networks. The visionary educational leader must look beyond the traditional boundaries of the K-12 system, and towards the space between the maternity ward and the kindergarten door.
