Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk.

Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Human Sexuality Today

Sociology

This book challenges sociologists and sociology students to think beyond the construction of social problems to tackle a central question: What do sociologists do with the analytic tools and academic skills afforded by their discipline to respond to social problems? *Service Sociology* posits that a central role of sociology is not simply to analyse and interpret social problems, but to act in the world in an informed manner to ameliorate suffering and address the structural causes of these problems. This volume provides a unique contribution to this approach to sociology, exploring the intersection between its role as an academic discipline and its practice in the service of communities and people. With both contemporary and historical analyses, the book traces the legacy, characteristics, contours, and goals of the sociology of service, shedding light on its roots in early American sociology and its deep connections to activism, before examining the social context that underlies the call for volunteerism, community involvement and non-profit organisations, as well as the strategies that have promise in remedying contemporary social problems. Presenting examples of concrete social problems from around the world, including issues of democratic participation, poverty and unemployment, student involvement in microlending, disaster mitigation, the organization and leadership of social movements, homelessness, activism around HIV/AIDS and service spring breaks, *Service Sociology and Academic Engagement in Social Problems* explores the utility of public teaching, participatory action research, and service learning in the classroom as a contribution to the community.
