High Fidelity News and Record Review

Public Law: Text, Cases, and Materials offers a fresh approach to the study of constitutional and administrative law by exploring how the law works in practice. The inclusion of extracts from key cases, government reports and academic articles demonstrates the law in action and the incisive commentary that accompanies them explains the significance of each. The expert authors have distilled their knowledge of the institutions and legal principles into concise, focused prose, and they encourage reflection through regular questions and hypothetical examples. This leading text provides students with a thorough and wide-ranging knowledge of public law, together with a full understanding of the theoretical and political debates in this fascinating and dynamic area of law. Online Resource Centre This book is accompanied by an Online Resource Centre which provides a link to the authors' Twitter feed, web links to useful sites and, for lecturers, a test bank of multiple choice questions with answers and feedback.

Pure economic loss is one of the most discussed and controversial legal issues in Europe today, raising complex questions which affect the law of tort and contract. How far can tort liability expand without imposing excessive burdens upon individual activity? Should the recovery of pure economic loss be the domain principally of the law of contract? And is there a common core of principles, policies and rules governing tortious liability for pure economic loss in Europe? Originally published in 2003, this is a comprehensive study of the subject, using a fact-based comparative method and in-depth research into the laws of thirteen European countries. Following a historical and analytical introduction to economic loss, experts from most European countries consider how their national systems would deal with the same practical problem, highlighting similarities and differences in a range of comprehensive issues. This is the third publication of the Common Core of European Private Law.

“Collaborative Product and Service Life Cycle Management for a Sustainable World” gathers together papers from the 15th ISPE International Conference on Concurrent Engineering (CE2008), to stimulate the new thinking that is so crucial to our sustained productivity enhancement and quality of life. It is already evident in this new century that the desire for sustainable development is increasingly driving the market to reach for new and innovative solutions that more effectively utilize the resources we have inherited from previous generations; with the obvious responsibility to future generations. Human productivity and progress can be positively engineered and managed in harmony with the provision and needs of our natural environment. One century on from the industrial revolution, this is now the time of the sustainable revolution; requiring holistic technological, process and people integrated solutions to sustained socio-economic enhancement.

The Cultivator & Country Gentleman

This book starts with an introduction to process modeling and process paradigms, then explains how to query and analyze process models, and how to analyze the process execution data. In this way, readers receive a comprehensive overview of what is needed to identify, understand and improve business processes. The book chiefly focuses on concepts, techniques and methods. It covers a large body of knowledge on process analytics – including process data querying, analysis, matching and correlating process data and models – to help practitioners and researchers understand the underlying concepts, problems, methods, tools and techniques involved in modern process analytics. Following an introduction to basic business process and process analytics concepts, it describes the state of the art in this area before examining different analytics techniques in detail. In this regard, the book covers analytics over different levels of process abstractions, from process execution data and methods for linking and correlating process execution data, to inferring process models, querying process execution data and process models, and scalable process data analytics methods. In addition, it provides a review of commercial process analytics tools and their practical applications. The book is intended for a broad readership interested in business process management and process analytics. It provides researchers with an introduction to these fields by comprehensively classifying the current state of research, by describing in-depth techniques and methods, and by highlighting future research directions. Lecturers will find a wealth of material to choose from for a variety of courses, ranging from undergraduate courses in business process management to graduate courses in business process analytics. Lastly, it offers professionals a reference guide to the state of the art in commercial tools and techniques, complemented by many real-world use case scenarios.

The Solicitors' Journal

This book explores the emergent and internationally widespread phenomenon of precariousness, specifically in relation to the home. It maps the complex reality of the insecure home by examining the many ways in which precariousness is manifested in legal and social change across a number of otherwise very different jurisdictions. By applying innovative work done by socio-legal scholars in other fields such as labour law and welfare law to the home, *Law and the Precarious Home* offers a broader theoretical understanding of contemporary 'precarisation' of law and society. It will enable reflections upon differential experience of home dependent upon class, race and gender from a range of local, national and cross-national perspectives. Finally it will explore the pluralisation of ideas of home in subjective experience, social reality and legal form. The answers offered in this book reflect the expertise and standing of the assembled authors who are international leaders in their field, with decades of first-hand practical and intellectual engagement with the area.

Based on interviews with leading sports journalists and grounded in the authors' experience and expertise in both the

sports journalism industry and sports media research, Sports Journalism gives in-depth insight into the editorial and ethical challenges facing sports journalists in a fast-changing media environment. The book considers how sports journalism's past has shaped its present and explores the future trends and trajectories that the industry could take. The far-reaching consequences of the digital revolution and social media on sports journalists' work are analysed, with prominent sports writers, broadcasters and academics giving their insights. While predominantly focused on the UK sports media industry, the book also provides a global perspective, and includes case studies, research and interviews from around the world. Issues of diversity - or a lack of it - in the industry are put into sharp focus. Sports Journalism gives both practising sports journalists and aspiring sports journalists vital contextualising information to make them more thoughtful and reflective practitioners.

Engineering services present a significant cost in terms of the installation cost, the energy consumed and the maintenance, repair and upgrading of the systems. It is therefore important that construction professionals have a good understanding of the basics and applications of building services engineering. This thoroughly up-dated fourth edition of David Chadderton's text provides study materials in the fields of construction, architectural, surveying and energy engineering. In particular, the chapters on The Built Environment and Energy Economics benefit from the author's recent industrial work. Additional material, including further questions, interactive calculations, simple PowerPoint material and links to related websites, are available on the author's website. David is a Chartered Professional Engineer with the Institution of Engineers Australia, a Chartered Building Services Engineer with the Engineering Council in the UK, through the Chartered Institution of Building Services Engineers, and a Member of the Australian Institute of Refrigeration, Air Conditioning and Heating. Since November 2001, David he has been Director of his own company, Eteq Pty Ltd. specializing in the designing and implementation of energy saving projects in commercial, health care, university and manufacturing buildings.

Law for Non-Law Students is written in a clear and readable style and aims to make the law understandable for readers at undergraduate or comparable level. It explains the practical influences under which the law has been formed, so that the student will be better able to understand why the law has developed in the way that it has. It gives lots of straightforward examples as to how the law works in practice and aims to equip students with the ability to appraise the effectiveness of the law in a particular circumstance rather than simply providing a list of rules for the student to regurgitate at exam time. The facts of the more important cases are given in some detail to enable the student to appreciate the range of factors

which the court may have taken into account in reaching its decision. The new edition has been updated to take account of all recent developments, both in relation to statute and to case law. Certain chapters, particularly in the area of sale of goods, have been substantially rewritten and expanded in an attempt to give more detail, while at the same time remaining student-friendly. New chapters on Agency and Negligence have been added. This new edition should be suitable for most courses which have a law element.

As an archivist or records manager it is essential to keep up to date with the complexities of copyright legislation, and Copyright for Archivists and Records Managers has been described as an 'unparalleled' resource for that purpose. What is copyright? Who owns it and for how long? What rights does it confer, and what are the limitations and exceptions? This comprehensive manual uniquely outlines copyright law in the UK with special reference to the unpublished materials commonly found in archive and records collections such as maps, legal records, records of local authorities and parish registers. It also gives comprehensive information on authorship and duration of copyright in older as well as modern works and on the wide range of exceptions and limitations to copyright, particularly those relevant to archivists, records managers, librarians and curators. It offers advice on rights in the electronic environment, moral rights and rights in databases and contains extensive tables of duration of copyright in other countries. The sixth edition of this respected work has been extensively revised and updated, in particular by: revision of the commentaries on the nature of originality in literary, dramatic, musical and artistic works and of a substantial part of a copyright work updating of the explanation of how a work of overseas origin qualifies for copyright protection in the UK, to reflect changes to the legislation revision of the commentaries on publication, issue of copies to the public and communication to the public more explanation of the exceptions for quotation, text and data mining, disability, rental and lending, education, broadcasts, access to digital material on the premises and the publication of older unpublished works updating of the charts for the duration of copyright where countries have amended their legislation This book will be useful reading for all archivists and records managers; LIS professionals in libraries, museums and galleries; students, researchers and genealogists.

Hawkins and Turner argue that coaching needs to step up to deliver value to all the stakeholders of the coachee, including those they lead, colleagues, investors, customers, partners, their local community and also the wider ecology. Systemic Coaching contains key chapters on how to contract in various settings, how to work relationally and dialogically, how to expand our own and others' ecological awareness, how to get greater value from supervision, work with systemic ethics and expand our impact. While illustrating why a new model of coaching is necessary, Hawkins and Turner also provide the tools and approaches that coaches and clients need to deliver this greater impact, accompanied by real-life case examples and interviews from the authors and other leading coaches and leaders globally. Systemic Coaching will be an invaluable resource for coaches in practice and in training, mentors, coach supervisors, consultants in leadership development and HR and L&D professionals and leaders.

Intended for first- and second-year undergraduates, this introduction to solid-state chemistry includes practical examples of applications and modern developments to offer students the opportunity to apply their knowledge in real-life situations. It aims to provide students with a thorough understanding of the traditional knowledge of crystal structures: lattices, unit cells, close packing, and octahedral and tetrahedral holes and their occupation by various ions in the well-known crystal structures. This descriptive work is augmented by free-electron and band theory. Links to other branches of chemistry and practical examples are emphasized, as are the links back to band theory and crystal structures. For this second edition, the book has been updated throughout and has two new chapters, one on X-ray diffraction techniques and another on solid-state preparative methods, as well as new sections on symmetry and ferroelectrics.

Since its original publication in 2000, this text has been intended for students studying HRM for the first time. Its major features are its comprehensive and wide-ranging nature which deals with all major aspects of HRM in a down to earth and practical way, alongside the necessary theoretical underpinning. The key strength is its accessibility to students new to the subject area where it combines a clear explanation with numerous relevant and interesting cases and comments. The range and nature of HRM is fully illustrated by a combination of real life and fictional case studies which heighten awareness of key issues involved in HRM today. This new edition will continue to be appropriate for undergraduate courses, especially first and second year students studying an HRM degree but also for post-graduate courses where many students are new to the field of HRM. It continues to be divided into 12 chapters to provide one topic a week on a modular course, but it may be extended into two semesters. It has been revised to place a greater emphasis on the role of human resources in improving organisational and employee performance. These revisions include the greater use of technology in resourcing and development areas, the change of emphasis from 'recruitment/selection' to 'talent management' and the use of social networking developments as an aid to HR management. Recent legal developments will also be covered including those relating to age discrimination and the regulation of agency workers. It will be supported by a supplement for tutors and additional web-based cases and other materials for tutors and students.

The Standards for Mathematical Practice are written in clear, concise language. Even so, to interpret them and visualize what they mean for your teaching practice isn't always easy. In this practical, easy-to-read book, Mike Flynn provides teachers with a clear and deep sense of these standards and shares ideas on how best to implement them in K-2 classrooms. Each chapter is dedicated to a different practice. Using examples from his own teaching and vignettes from many other K-2 teachers, Mike does the following: Invites you to break the cycle of teaching math procedurally Demonstrates what it means for children to understand--not just do--math Explores what it looks like when young children

embrace the important behaviors espoused by the practices The book's extensive collection of stories from K-2 classroom provides readers with glimpses of classroom dialogue, teacher reflections, and examples of student work. Focus questions at the beginning of each vignette help you analyze the examples and encourage further reflection. Beyond Answers is a wonderful resource that can be used by individual teachers, study groups, professional development staff, and in math methods courses.

We have built a world that no longer fits our bodies. Our genes - selected through our evolution - and the many processes by which our development is tuned within the womb, limit our capacity to adapt to the modern urban lifestyle. There is a mismatch. We are seeing the impact of this mismatch in the explosion of diabetes, heart disease and obesity. But it also has consequences in earlier puberty and old age. Bringing together the latest scientific research in evolutionary biology, development, medicine, anthropology and ecology, Peter Gluckman and Mark Hanson, both leading medical scientists, argue that many of our problems as modern-day humans can be understood in terms of this fundamental and growing mismatch. It is an insight that we ignore at our peril.
