Cannabis sativa is best known as the source of marijuana, the world's most widely consumed illicit recreational drug. However, the plant is also extremely useful as a source of stem fiber, edible seed oil, and medicinal compounds, all of which are undergoing extremely promising research, technological applications, and business investment. Indeed, despite its capacity for harm as a recreational drug, cannabis has phenomenal potential for providing new products to benefit society and for generating extensive employment and huge profits. Misguided policies, until recently, have prevented legitimate research on the beneficial properties of cannabis, but there is now an explosion of societal, scientific, and political support to reappraise and remove some of the barriers to usage. Unfortunately, there is also a corresponding dearth of objective analysis. Towards redressing the limitation of information, Cannabis: A Complete Guide is a comprehensive reference summarizing botanical, business, chemical, ecological, genetic, historical, horticultural, legal, and medical considerations that are critical for the wise advancement and management of cannabis in its various forms. This book documents both the risks and benefits of what is indisputably one of the world's most important

species. The conflicting claims for medicinal virtues and toxicological vices are examined, based mainly on the most recent authoritative scientific reviews. The attempt is made consistently to reflect majority scientific opinion, although many aspects of cannabis are controversial. Aside from the relevance to specialists, the general public should find the presentation attractive because of the huge interest today in marijuana. Unfortunately, society has become so specialized and compartmentalized that most people have limited appreciation of the importance of science to their lives, except when a topic like marijuana becomes sensationalized. This review of cannabis can serve as a vehicle for public education in the realm of science and technology. Indeed, towards the goal of disseminating the important information in this book to a wide audience, the presentation is user-friendly, concise, and well-illustrated in the hope that non-specialists will find the topics both informative and entertaining.

predominantly on 10 years of ethnographic research with cannabis growers, the result is a description of cannabis cultivation, and cannabis cultivators, in the industrialised world. The book explores how cannabis is grown. Most cannabis in Western countries is grown indoors with increasingly hi-tech cultivation methods being utilised. The methods employed by individual growers will depend on their opportunities, their intentions, and, importantly, any ideological position which may influence their choice. It also explores who is involved in cannabis growing. Growers come from a wide range of backgrounds, but many share common 'ideological' traits that are rooted in an affiliation to a wider cannabis culture. A typology of cannabis growers is offered based on motivation and ideology. The key point here is that a large number of cannabis growers seek no financial reward whatsoever for their involvement in what is essentially an act of drug trafficking. Other growers do make money, but are equally motivated by non-financial 'drivers'. Still others are mostly or entirely driven by financial considerations. These growers often display the same hallmarks as other drug-trafficking outfits. Consumer concerns can be seen to influence the market with smaller independent 'social' and 'social/commercial' growers offering an ideological - ethical, even-alternative to larger scale organised crime outfits. Finally, explanations for the recent surges in domestic cannabis cultivation seen all over the Western world are offered along with predictions for the future of domestic production not just of cannabis but other drugs as well.

crippling pain. Some fear it is a dangerous drug with addictive properties; to others still it is a legal anomaly and should be decriminalized. Whatever the viewpoint, and by whatever name it is known, cannabis--or marijuana, hashish, dope, pot, weed, grass, ganja--incites debate at every level, and the effect it has on the cultures and economics of every corner of the globe is undeniable. In this definitive study, Martin Booth crafts a tale of medical advance, religious enlightenment, political subterfuge and human rights; of law enforcement and custom officers, cunning smugglers, street pushers, gang warfare, writers, artists, musicians, and happy-go-lucky hippies and potheads. Booth chronicles the fascinating and often mystifying process through which cannabis, a relatively harmless substance, became outlawed throughout the Western world, and the devastating effect such legislation has on the global economy. Above all, he demonstrates how the case for decriminalization remains one of the twenty-first century's hottest topics.

A Best Book of the Year for the Chicago Tribune, Washington Post, San Francisco Chronicle, and Los Angeles Times Part noir, part psychedelic romp, all Thomas Pynchon—private eye Doc Sportello surfaces, occasionally, out of a marijuana haze to watch the end of an era. It's been awhile since Doc Sportello has seen his ex-girlfriend. Suddenly out of nowhere she shows up with a story about a plot to kidnap a billionaire land developer whom she just happens to be in love with. It's the tail end of the psychedelic sixties in L.A., and Doc knows that "love" is another one of those words going around at the moment, like "trip" or "groovy," except this one usually leads to trouble. In this lively yarn, Thomas Pynchon, working in an unaccustomed genre, provides a classic illustration of the principle that if you can remember the sixties, you weren't there . . . or . . . if you were there, then you . . . or, wait, is it . . .

OG Kush. Sour Diesel. Wax, shatter, and vapes. Marijuana has come a long way since its seedy days in the back parking lots of our culture. So has Howard S. Becker, the eminent sociologist, jazz musician, expert on “deviant” culture, and founding NORML board member. When he published *Becoming a Marihuana User* more than sixty years ago, hardly anyone paid attention—because few people smoked pot. Decades of Cheech and Chong films, *Grateful Dead* shows, and *Cannabis Cups* later, and it's clear—marijuana isn't just an established commodity, it's an entire culture. And that's just the thing—Becker totally called it: pot has everything to do with culture. It's not a blight on culture, but a culture itself—in fact, you'll see in this book the first use of the term “users,” rather than “abusers” or “addicts.” Come

along on this short little study—now a famous timestamp in weed studies—and you will be astonished at how relevant it is to us today. Becker doesn't judge, but neither does he holler for legalization, tell you how to grow it in a hollowed-out dresser, or anything else like that for which there are plenty of other books you can buy. Instead, he looks at marijuana with a clear sociological lens—as a substance that some people enjoy, and that some others have decided none of us should. From there he asks: so how do people decide to get high, and what kind of experience do they have as a result of being part of the marijuana world? What he discovers will bother some, especially those who proselytize the irrefutably stunning effects of the latest strain: chemistry isn't everything—the important thing about pot is how we interact with it. We learn to be high. We learn to like it. And from there, we teach others, passing the pipe in a circle that begins to resemble a bona fide community, defined by shared norms, values, and definitions just like any other community. All throughout this book, you'll see the intimate moments when this transformation takes place. You'll see people doing it for the first time and those with considerable experience. You'll see the early signs of the truths that have come to define the marijuana experience: that you probably won't get high at first, that you have to hold the hit in, and that there are other people here who are going to smoke that, too.
