The Geek Gap is thoroughly original, virtually unique, of paramount importance and, on top of ALL that, a 'great read.' Bill Pfleging and Minda Zetlin deserve a giant 'Hats off' for this wonderful piece of work. --Tom Peters Business managers (suits) and technology professionals (geeks) have become warring camps in too many companies. While both groups have no

trouble following the lingo of their own specialties, when they have to communicate with each other, neither side fully understands-or wants to understand-the other. And that's a big problem in an increasingly technology-dependent business environment where success depends on the smooth integration of both business savvy and technological expertise. Bill Pfleging-a respected computer and Web consultant-and Minda Zetlin-a veteran business writer-explore, in this insightful, witty, and very instructive book, the culture clash that pervades nearly every business-technology interaction. The Geek Gap provides members of both camps a practical guide to working together effectively. Using many real-world examples, the authors vividly illustrate the consequences in time, money, careers, and even lives when these separate cultures fail to communicate. By far the most serious example was the Challenger space shuttle disaster, which was likely the direct result of an internal clash and lack of communication between NASA's managers and engineers. The authors provide practical solutions for building trust between business and computer professionals. The book is filled with tips aimed at geeks and suits to help each group understand the other, communicate in what amounts to a foreign language, and get what they need to do their jobs effectively. The authors profile companies and individual executives who have successfully bridged the gap by conducting events that bring the two groups together, switching jobs from one area to the other, creating whole new careers as go-betweens, and much, much more. This is the first book to directly address issues of communication and understanding between business and technology

### **Maximise Potential**

A frank, smart and captivating memoir by the daughter of Apple founder Steve Jobs. Born on a farm and named in a field by her parents—artist Chrisann Brennan and Steve Jobs—Lisa Brennan-Jobs's childhood unfolded in a rapidly changing Silicon Valley. When she was young, Lisa's father was a mythical figure who was rarely present in her life. As she grew older, her father took an interest in her, ushering her into a new world of mansions, vacations, and private schools. His attention was thrilling, but he could also be cold, critical and unpredictable. When her relationship with her mother grew strained in high school, Lisa decided to move in with her father, hoping he'd become the parent she'd always wanted him to be. *Small Fry* is Lisa Brennan-Jobs's poignant story of childhood and growing up. Scrappy, wise, and

Part portrait of a complex family, part love letter to California in the seventies and eighties, *Small Fry* is an enthralling story by an insightful new literary voice.

#1 NEW YORK TIMES BESTSELLER • A grand vision defined: The CEO of Disney, one of Time's most influential people of 2019, shares the ideas and values he embraced to reinvent one of the most beloved companies in the world and inspire the people who bring the magic to life. Robert Iger became CEO of The Walt Disney Company in 2005, during a difficult time. Competition was more intense than ever and technology was changing faster than at any time in the company's history. His vision came down to three clear ideas: Recommit to the concept that quality matters, embrace technology instead of fighting it, and think bigger—think global—and turn Disney into a stronger brand in international markets. Twelve years later, Disney is the largest, most respected media company in the world, counting

Pixar, Marvel, Lucasfilm, and 21st Century Fox among its properties. Its value is nearly five times what it was when Iger took over, and he is recognized as one of the most innovative and successful CEOs of our era. In *The Ride of a Lifetime*, Robert Iger shares the lessons he's learned while running Disney and leading its 200,000 employees, and he explores the principles that are necessary for true leadership, including:

- Optimism. Even in the face of difficulty, an optimistic leader will find the path toward the best possible outcome and focus on that, rather than give in to pessimism and blaming.
- Courage. Leaders have to be willing to take risks and place big bets. Fear of failure destroys creativity.
- Decisiveness. All decisions, no matter how difficult, can be made on a timely basis. Indecisiveness is both wasteful and destructive to morale.
- Fairness. Treat people decently, with empathy, and be accessible to them.

This book is about the relentless curiosity that has driven Iger for forty-five years, since the day he started as the lowliest studio grunt at ABC. It's also about thoughtfulness and respect, and a decency-over-dollars approach that has become the bedrock of every project and partnership Iger pursues, from a deep friendship with Steve Jobs in his final years to an abiding love of the Star Wars mythology. "The ideas in this book strike me as universal" Iger writes. "Not just to the aspiring CEOs of the world, but to anyone wanting to feel less fearful, more confidently themselves, as they navigate their professional and even personal lives."

In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is

19 year old Jake Heilbrunn presents Off the Beaten Trail, called by many as "the young dude version of Wild and Eat Pray Love." 2 x NYT best selling author Chris Guillebeau praised the inspiring memoir as a "brave, beautiful book that can help you when you arrive at your next set of crossroads." At 18, Jake Heilbrunn entered college like millions of other high school graduates. But deep down, he knew something was wrong. After developing a chronic skin condition and becoming anxious and depressed, Jake realized the path he was on didn't align with his dreams. Listening to his inner voice and following his heart, he took a leap of faith, left school and hopped on a one-way flight to Guatemala. Without a phone and having no knowledge of Spanish, he spent four months backpacking through Guatemala, Nicaragua and Costa Rica so he could explore other ways of life and disconnect from a society dominated by social media. From camping in the jungle and teaching poverty-stricken children to meeting inspirational people from around the world, Jake's quest took him to remote locations beyond the fringes of civilization. His pilgrimage led him to realize there are limitless ways to live and that people can create their own destinies through self-reflection and then taking action. Jake's story shows that it is in the pursuit of our dreams and passions--not the destination--where we find personal

Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! On October 5, 2011, the news of the death of technology innovator Steve Jobs rocked the world. The failing health of the Apple cofounder and Pixar CEO was no secret. Jobs had given up his role as Apple's CEO just a few months prior because of his struggle with pancreatic cancer. But his death still drew a huge reaction. From Apple employees and fans to political and business leaders, people honored Jobs's passing by reflecting on his prolific life that greatly influenced the way technology is used. In 1976, Jobs founded Apple Computer with Steve Wozniak. As the leaders of Apple, they developed concepts—such as navigating by using a mouse to click screen icons—that shaped the way we use and interact with computers. Jobs's forward-thinking engineering also influenced pop culture, bringing us a music revolution with the iPod, the ultimate communication device with the iPhone, and some of the first computer-animated films through Pixar. Called by some "the da Vinci of our time," Jobs used his innovation and vision to help advance technology like no other. He lived his life following a simple premise: "The only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do."

### **Steve Jobs' Life By Design**

On June 12, 2005, Steve Jobs gave his first—and only—commencement address, to the 114th graduating class at Stanford University, an audience of approximately 23,000. They witnessed history: Jobs' 22-minute prepared speech subsequently reached 26 million online viewers worldwide. It is by far the most popular commencement address in history, framed with "three stories" that succinctly summed up the most important lessons Jobs learned in life. Life-changing lessons, he explained, can only be connected when looking back, which he had done in preparation for his talk. Steve Jobs' Life by Design starts with Jobs' own words in the text of his talk and expands outward from there. In the address, Jobs gave us the dots, but he didn't have the luxury of time to connect them. So much about his life, his viewpoint, and his personal and business philosophies were mentioned but not explained. We know what he said, but what actually did he mean? What can we learn from him? This book connects those dots. We

see Jobs' life and career through his own eyes, in context, and in proper perspective. His process of looking back illuminated his life—and by doing so, he serves as an inspiration to illuminate our lives as well.

A dynamic and exciting way to understand success and failure, through the life of Hannibal, one of history's greatest generals. The life of Hannibal, the Carthaginian general who crossed the Alps with his army in 218 B.C.E., is the stuff of legend. And the epic choices he and his opponents made—on the battlefield and elsewhere in life—offer lessons about responding to our victories and our defeats that are as relevant today as they were more than 2,000 years ago. A big new idea book inspired by ancient history, *Hannibal and Me* explores the truths behind triumph and disaster in our lives by examining the decisions made by Hannibal and others, including Albert Einstein, Eleanor Roosevelt, Steve Jobs, Ernest Shackleton, and Paul Cézanne—men and women who learned from their mistakes. By showing why some people overcome failure and others succumb to it, and why some fall victim to success while others thrive on it, *Hannibal and Me* demonstrates how to recognize the seeds of success within our own failures and the threats of failure hidden in our successes. The result is a page-turning adventure tale, a compelling human drama, and an insightful guide to understanding behavior. This is essential reading for anyone who seeks to transform misfortune into success at work, at home, and in life.
