The Essence of Leadership

In *More God, Less Crime* renowned criminologist Byron R. Johnson proves that religion can be a powerful antidote to crime. The book describes how faith communities, congregations, and faith-based organizations are essential in forming partnerships necessary to provide the human and spiritual capital to effectively address crime, offender rehabilitation, and the substantial aftercare problems facing former prisoners. There is scattered research literature on religion and crime but until now, there has never been one publication that systematically and rigorously analyzes what we know from this largely overlooked body of research in a lay-friendly format. The data shows that when compared to current strategies, faith-based approaches to crime prevention bring added value in targeting those factors known to cause crime: poverty, lack of education, and unemployment. In an age of limited fiscal resources, Americans can't afford a criminal justice system that turns its nose up at volunteer efforts that could not only work better than the abysmal status quo, but also save billions of dollars at the same time. This book provides readers with practical insights and recommendations for a faith-based response that could do just that.

Oneness

Beyond Religion

An unaltered reprint of the 1987 original.

Proceedings

Spatial Variability in Unsaturated Flow Beneath Playa and Adjacent Interplaya Settings and Implications for Contaminant Transport, Southern High Plains, Texas

This work is an in-depth, on-the-ground examination of how prisons impact rural communities, including a revealing study of two rural communities that have chosen prisons as an economic development strategy. * Provides compelling data from over 200 formal and informal interviews of local politicians, residents, and prison officials, including the former directors of Texas's prison system * Utilizes a combination of two qualitative methods to conduct the research

The Big Payback

From bestselling author Jon Gordon and rising star Damon West comes The Coffee Bean: an illustrated fable that teaches readers how to transform their environment, overcome challenges, and create positive change. Life is often difficult. It can be harsh, stressful, and feel like a pot of boiling hot water. The environments we find ourselves in can change, weaken, or harden us, and test who we truly are. We can be like the carrot that weakens in the pot or like the egg that hardens. Or, we can be like the coffee bean and discover the power inside us to transform our environment. The Coffee Bean is an inspiring tale that follows Abe, a young man filled with stress and fear as he faces challenges and pressure at school and home. One day after class, his teacher shares with him the life-changing lesson of the coffee bean, and this powerful message changes the way he thinks, acts, and sees the world. Abe discovers that instead of letting his environment change him for the worse, he can transform any environment he is in for the better. Equipped with this transformational truth, Abe embarks on an inspirational journey to live his life like the coffee bean. Wherever his life takes him, from school, to the military, to the

business world, Abe demonstrates how this simple lesson can unleash the unstoppable power within you. A delightful, quick read, *The Coffee Bean* is purposely written and designed for readers of all ages so that everyone can benefit from this transformational lesson. This is a book and message that, when read and shared, has the power to change your life and the world around you. You just have to decide: are you a carrot, egg, or coffee bean?

Social

“There has never been a better book about hip-hop...a record-biz portrait that jumps off the page.”—A.V. Club *THE INSPIRATION FOR THE VH1 SERIES THE BREAKS* *The Big Payback* takes readers from the first \$15 made by a “rapping DJ” in 1970s New York to the multi-million-dollar sales of the Phat Farm and Roc-a-Wear clothing companies in 2004 and 2007. On this four-decade-long journey from the studios where the first rap records were made to the boardrooms where the big deals were inked, *The Big Payback* tallies the list of who lost and who won. Read the secret histories of the early long-shot successes of Sugar Hill Records and Grandmaster Flash, Run DMC's crossover breakthrough on MTV, the marketing of gangsta rap, and the rise of artist/ entrepreneurs like Jay-Z and Sean “Diddy” Combs. 300 industry giants like Def Jam founders Rick Rubin and Russell Simmons gave their stories to renowned hip-hop journalist Dan Charnas, who provides a compelling, never-before-seen, myth-debunking view into the victories, defeats, corporate clashes, and street battles along the 40-year road to hip-hop's dominance. INCLUDES PHOTOGRAPHS

Death Row: The Final Minutes

A follow-up to the best-selling *Ethics for a New Millennium* outlines a system of secular ethics that both transcends religion and incorporates religious tolerance for the overall improvement of human life on individual, community and global levels, offering an accompanying guided meditation practice for cultivating key human values.

Solutions

FORTIFIED uses God's restoration of the city of Jerusalem as a metaphor for how He restores us. In *FORTIFIED* you will learn: the three enemies that attack the city of your life the four places they attack and how God will set you free. This is a simple, powerful tool that you can use for yourself and as you go to help others walk in God's promised freedom.

Public Sector Integrity A Framework for Assessment

"The research presented in volume 37 of Crime and Justice is essential reading for scholars, policy makers, and criminal justice practitioners who need an authoritative review of current developments on crime, its causes, and its consequences. Through an international and disciplinary approach to core issues in criminology, the essays analyze important developments in the criminal justice system to enhance the work of sociologists, psychologists, criminal lawyers, justice scholars, and political scientists."--BOOK JACKET.

Report of Investigations

The Change Agent

This assessment framework for public sector integrity provides policy makers and managers with a pioneering roadmap to design and organise sound assessments in specific public organisations and sectors.

Corrections and Collections

The rapid growth of online media has led to new complications in journalism ethics and practice. While traditional ethical principles may not fundamentally change when information is disseminated online, applying them across platforms has become more challenging as new kinds of interactions develop between journalists and audiences. In *Ethics for Digital Journalists*, Lawrie Zion and David Craig draw together the international expertise and experience of journalists and scholars who have all been part of the process of shaping best practices in digital journalism. Drawing on contemporary events and controversies like the Boston Marathon bombing and the Arab Spring, the authors examine emerging best practices in

everything from transparency and verification to aggregation, collaboration, live blogging, tweeting and the challenges of digital narratives. At a time when questions of ethics and practice are challenged and subject to intense debate, this book is designed to provide students and practitioners with the insights and skills to realize their potential as professionals.

Locked Down, Locked Out

Governing Prisons

The Literary World

America holds more than two million inmates in its prisons and jails, and hosts more than two million daily visits to museums, figures which represent a ten-fold increase in the last twenty-five years. *Corrections and Collections* explores and connects these two massive expansions in our built environment. Author Joe Day shows how institutions of discipline and exhibition have replaced malls and office towers as the anchor tenants of U.S. cities. Prisons and museums, though diametrically opposed in terms of public engagement, class representation, and civic pride, are complementary structures, employing related spatial and visual tactics to secure and array problematic citizens or priceless treasures. Our recent demand for museums and prisons has encouraged architects to be innovative with their design, and experimental with their scale and distribution through our cities. Contemporary museums are the petri dishes of advanced architectural speculation; prisons remain the staging grounds for every new technology of constraint and oversight. Now that criminal and creative transgression are America's defining civic priorities, *Corrections and Collections* will recalibrate your assumptions about art, architecture, and urban design.

In Defense of Food

Many studies during the past few decades have sought to determine whether the death penalty has any deterrent effect on homicide rates. Researchers have reached widely varying, even contradictory, conclusions. Some studies have concluded that the threat of capital punishment deters murders, saving large numbers of lives; other studies have concluded that executions actually increase homicides; still others, that executions have no effect on murder rates. Commentary among researchers, advocates, and policymakers on the scientific validity of the findings has sometimes been acrimonious. Against this backdrop, the National Research Council report *Deterrence and the Death Penalty* assesses whether the available evidence provides a scientific basis for answering questions of if and how the death penalty affects homicide rates. This

new report from the Committee on Law and Justice concludes that research to date on the effect of capital punishment on homicide rates is not useful in determining whether the death penalty increases, decreases, or has no effect on these rates. The key question is whether capital punishment is less or more effective as a deterrent than alternative punishments, such as a life sentence without the possibility of parole. Yet none of the research that has been done accounted for the possible effect of noncapital punishments on homicide rates. The report recommends new avenues of research that may provide broader insight into any deterrent effects from both capital and noncapital punishments.

Ethics for Digital Journalists

In the era of mass incarceration, over 600,000 people are released from federal or state prison each year, with many returning to chaotic living environments rife with violence. In these circumstances, how do former prisoners navigate reentering society? In *Homeward*, sociologist Bruce Western examines the tumultuous first year after release from prison. Drawing from in-depth interviews with over one hundred individuals, he describes the lives of the formerly incarcerated and demonstrates how poverty, racial inequality, and failures of social support trap many in a cycle of vulnerability despite their efforts to rejoin society. Western and his research team conducted comprehensive interviews with men and women released from the Massachusetts state prison system who returned to neighborhoods around Boston. Western finds that for most, leaving prison is associated with acute material hardship. In the first year after prison, most respondents could not afford their own housing and relied on family support and government programs, with half living in deep poverty. Many struggled with chronic pain, mental illnesses, or addiction—the most important predictor of recidivism. Most respondents were also unemployed. Some older white men found union jobs in the construction industry through their social networks, but many others, particularly those who were black or Latino, were unable to obtain full-time work due to few social connections to good jobs, discrimination, and lack of credentials. Violence was common in their lives, and often preceded their incarceration. In contrast to the stereotype of tough criminals preying upon helpless citizens, Western shows that many former prisoners were themselves subject to lifetimes of violence and abuse and encountered more violence after leaving prison, blurring the line between victims and perpetrators. Western concludes that boosting the social integration of former prisoners is key to both ameliorating deep disadvantage and strengthening public safety. He advocates policies that increase assistance to those in their first year after prison, including guaranteed housing and health care, drug treatment, and transitional employment. By foregrounding the stories of people struggling against the odds to exit the criminal justice system, *Homeward* shows how overhauling the process of prisoner reentry and rethinking the foundations of justice policy could address the harms of mass incarceration.

Religion and Crime: Theory, Research, and Practice

This book presents adaptations of the therapeutic community (TC) model and method for special populations of substance abusers, and implementation in a variety of institutions and human service settings. Included are pregnant adult addicts and their children, adolescents, prison inmates and parolees, the homeless, and chronically ill clients in methadone treatment. The settings include community residence and transitional housing facilities, state prisons, county jails, homeless shelters, mental hospitals, inpatient wards and outpatient clinics, as well as community based treatment programs.

Community as Method

Cites the reasons why people have become so confused about their dietary choices and discusses the importance of enjoyable moderate eating of mostly traditional plant foods.

Texas Juvenile Law

For 60 million Americans a criminal record overshadows everything else about their identity. Citizens have a right to know when someone around them represents a threat. But convicted persons have rights too. James Jacobs examines the problem of erroneous records and proposes ways to eliminate discrimination for those who have been rehabilitated.

Children of the Prison Boom

Corrections officials faced with rising populations and shrinking budgets have increasingly welcomed "faith-based" providers offering services at no cost to help meet the needs of inmates. Drawing from three years of on-site research, this book utilizes survey analysis along with life-history interviews of inmates and staff to explore the history, purpose, and functioning of the Inmate Minister program at Louisiana State Penitentiary (aka "Angola"), America's largest maximum-security prison. This book takes seriously attributions from inmates that faith is helpful for "surviving prison" and explores the implications of religious programming for an American corrections system in crisis, featuring high recidivism, dehumanizing violence, and often draconian punishments. A first-of-its-kind prototype in a quickly expanding policy arena, Angola's unique Inmate Minister program deploys trained graduates of the New Orleans Baptist Theological Seminary in bi-vocational pastoral service roles throughout the prison. Inmates lead their own congregations and serve in lay-ministry capacities in hospice, cell block visitation, delivery of familial death notifications to fellow inmates, "sidewalk counseling" and tier ministry, officiating inmate funerals, and delivering "care packages" to indigent prisoners. Life-history interviews uncover deep-level change in self-identity corresponding with a growing body of research on identity change and religiously motivated desistance. The concluding chapter addresses concerns regarding the First Amendment, the dysfunctional state

of U.S. corrections, and directions for future research.

Sheriff's Guide to Effective Jail Operations - Scholar's Choice Edition

No descriptive material is available for this title.

The Coffee Bean

Children of the Prison Boom describes the devastating effects of America's experiment in mass incarceration for a generation of vulnerable children. Wakefield and Wildeman find that parental imprisonment leads to increased mental health and behavioral problems, infant mortality, and child homelessness which translate into large-scale increases in racial inequality.

Sonny's Blues

What are the primary constituents of stress in prison, and how can it be ameliorated? The specific conditions that create stress -- from the initial loss of freedom, to overcrowding, victimization and riots -- are described and analyzed. The effects of prison on specific populations: women, minorities, adolescents, and parolees, are also researched. Recommendations for long-term policy are made for maximizing the environmental resources of the prison, and improving classification and treatment. `highly recommended for all professional and academic libraries. It is suitable for both upper-division undergraduate and graduate students in the areas of stress, psychology, penology, sociology, and criminal justice.' -- Choi

The Eternal Criminal Record

The Big House in a Small Town

Mass incarceration. In recent years it's become clear that the size of America's prison population is unsustainable -- and isn't needed to protect public safety. In this remarkable bipartisan collaboration, the country's most prominent public figures and experts join together to propose ideas for change. In these original essays, many authors speak out for the first time on the issue. The vast majority agree that reducing our incarcerated population is a priority. Marking a clear political shift on crime and punishment in America, these sentiments are a far cry from politicians racing to be the most punitive in the 1980s and 1990s. Mass incarceration threatens American democracy. Hiding in plain sight, it drives economic

inequality, racial injustice, and poverty. How do we achieve change? From using federal funding to bolster police best practices to allowing for the release of low-level offenders while they wait for trial, from eliminating prison for low-level drug crimes to increasing drug and mental health treatment, the ideas in this book pave a way forward. Solutions promises to further the intellectual and political momentum to reform our justice system.

Deterrence and the Death Penalty

Examines the role of prison gangs and their members in controlling life in prison.

Crime and Justice

IN 12 YEARS, MICHELLE LYONS WITNESSED NEARLY 300 EXECUTIONS. First as a reporter and then as a spokesperson for the Texas Department of Criminal Justice, Michelle was a frequent visitor to Huntsville's Walls Unit, where she recorded and relayed the final moments of death row inmates' lives before they were put to death by the state. Michelle was in the death chamber as some of the United States' most notorious criminals, including serial killers, child murderers and rapists, spoke their last words on earth, while a cocktail of lethal drugs surged through their veins. Michelle supported the death penalty, before misgivings began to set in as the executions mounted. During her time in the prison system, and together with her dear friend and colleague, Larry Fitzgerald, she came to know and like some of the condemned men and women she saw die. She began to query the arbitrary nature of the death penalty and ask the question: do executions make victims of all of us? An incredibly powerful and unique look at the complex story of capital punishment, as told by those whose lives have been shaped by it, *Death Row: The Final Minutes* is an important take on crime and punishment at a fascinating point in America's political history.

Children of Incarcerated Parents

There are many great books on marriage. *Oneness* seeks to participate in the conversation by rediscovering some of the foundational truths God built life and marriage upon. Those truths are found in the Garden of Eden, where we find God's image-bearing design for man and woman and His intent for marriage. So much of what is in the Garden has been lost to our modern lives, yet so much of what we suffer and miss can be traced back to His beginning. Whether you are considering getting married or have been married for a while, *Oneness* will provide you with foundational truths upon which you can build, or repair, your marriage so that you can live God's intent, unafraid of whatever may come your way.

Handbook on Prisoners with Special Needs

To launch NIJ's dedicated strategic investment in this area, we held a two-day convening on October 22 and 23, 2015, composed of a diverse group of more than 80 experts from federal, state, and local corrections agencies, advocacy groups, academia, and research organizations. This group convened to discuss (1) what we know and don't know about the inmates who are put into this type of housing; (2) the relationship between institutional violence and restrictive housing; (3) issues related to the mental health of inmates, officer and inmate safety and wellness, civil rights, and safe alternatives to restrictive housing; and (4) the gaps in data collection efforts and the existing empirical literature. Throughout the two days, attendees discussed the research gaps in restrictive housing and debated the multiple policy and practice concerns that currently exist. NIJ greatly appreciates these experts' participation as they shared their individual perspectives and contributed to identifying how best to move forward in developing restrictive housing policies and practices that are grounded in science. Certainly, the most comprehensive understanding of restrictive housing can only come when we consider the various facets that characterize its use and impact and consider how these issues affect our theoretical and practical understanding of this correctional practice.

Fortified

Sentenced to sixty-five years in a Texas prison, Damon West once had it all. He came from a great family, in a home full of God, love, support, and opportunities to reach any goal. A natural born leader, an athlete with good looks and charm, he appeared to be the all-American kid pursuing his dreams. Underneath this facade, however, was an addict in the early stages of disease. After suffering childhood sexual abuse by a babysitter at the age of nine, Damon began putting chemicals into his body to alter the way he felt. Once he was introduced to methamphetamines, however, he became instantly hooked—and the lives of so many innocent people would forever be changed by the choices he made in order to feed his insatiable meth habit. After a fateful discussion during his incarceration with a seasoned convict, Damon had a spiritual awakening. He learned that, like a coffee bean changing with the application of heat and pressure, he was capable of changing the environment around him. Armed with a program of recovery, a renewed faith, and a miraculous second chance at life, Damon emerged from over seven years of prison a changed man. His story of redemption continues to inspire audiences today.

Competing for Control

Restrictive Housing in the U.s. Issues, Challenges, and Future Directions Issues, Challenges, and Future Directions

We are profoundly social creatures--more than we know. In *Social*, renowned psychologist Matthew Lieberman explores groundbreaking research in social neuroscience revealing that our need to connect with other people is even more fundamental, more basic, than our need for food or shelter. Because of this, our brain uses its spare time to learn about the social world--other people and our relation to them. It is believed that we must commit 10,000 hours to master a skill. According to Lieberman, each of us has spent 10,000 hours learning to make sense of people and groups by the time we are ten. *Social* argues that our need to reach out to and connect with others is a primary driver behind our behavior. We believe that pain and pleasure alone guide our actions. Yet, new research using fMRI--including a great deal of original research conducted by Lieberman and his UCLA lab--shows that our brains react to social pain and pleasure in much the same way as they do to physical pain and pleasure. Fortunately, the brain has evolved sophisticated mechanisms for securing our place in the social world. We have a unique ability to read other people's minds, to figure out their hopes, fears, and motivations, allowing us to effectively coordinate our lives with one another. And our most private sense of who we are is intimately linked to the important people and groups in our lives. This wiring often leads us to restrain our selfish impulses for the greater good. These mechanisms lead to behavior that might seem irrational, but is really just the result of our deep social wiring and necessary for our success as a species. Based on the latest cutting edge research, the findings in *Social* have important real-world implications. Our schools and businesses, for example, attempt to minimize social distractions. But this is exactly the wrong thing to do to encourage engagement and learning, and literally shuts down the social brain, leaving powerful neuro-cognitive resources untapped. The insights revealed in this pioneering book suggest ways to improve learning in schools, make the workplace more productive, and improve our overall well-being.

Homeward

Through the stories of prisoners and their families, including her own family's experiences, Maya Schenwar shows how the institution that locks up 2.3 million Americans and decimates poor communities of color is shredding the ties that, if nurtured, could foster real collective safety. As she vividly depicts here, incarceration takes away the very things that might enable people to build better lives. But looking toward a future beyond imprisonment, Schenwar profiles community-based initiatives that successfully deal with problems—both individual harm and larger social wrongs—through connection rather than isolation, moving toward a safer, freer future for all of us.

The Pains of Imprisonment

Business and Commerce Code

This volume provides a comprehensive review of the essentials of the Therapeutic Community (TC) theory and its practical "whole person" approach to the treatment of substance abuse disorders and related problems. Part I outlines the perspective of the traditional views of the substance abuse disorder, the substance abuser, and the basic components of this approach. Part II explains the organizational structure of the TC, its work components, and the role of residents and staff. The chapters in Part III describe the essential activities of TC life that relate most directly to the recovery process and the goals of rehabilitation. The final part outlines how individuals change in the TC behaviorally, cognitively, and emotionally. This is an invaluable resource for all addictions professionals and students.
