### **Attack of the Goblin Army**

#1 NEW YORK TIMES BESTSELLER When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent “grand design” of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the “multiverse”—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a “theory of everything”: the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

### **The Ultimate Guide to Mastering Circuit Power!**

The legacy of the residential school system ripples throughout Native Canada, its fingerprints on the domestic violence, poverty, alcoholism, drug abuse, and suicide rates that continue to cripple many Native communities. *Magic Weapons* is the first major survey of Indigenous writings on the residential school system, and provides groundbreaking readings of life writings by Rita Joe (Mi'kmaq) and Anthony Apakark Thrasher (Inuit) as well as in-depth critical studies of better known life writings by Basil Johnston (Ojibway) and Tomson Highway (Cree). *Magic Weapons* examines the ways in which Indigenous survivors of residential school mobilize narrative in their struggles for personal and communal empowerment in the shadow of attempted cultural genocide. By treating Indigenous life-writings as carefully crafted aesthetic creations and interrogating their relationship to more overtly politicized historical discourses, Sam McKegney argues that Indigenous life-writings are culturally generative in ways that go beyond disclosure and recompense, re-envisioning what it means to live and write as Indigenous individuals in post-residential school Canada.

How far will four friends go for immortality? This novel is Hugo and Nebula Award-winning author “Robert Silverberg at his very best” (George R. R. Martin). After Eli, a scholarly college student, finds and translates an ancient manuscript called *The Book of Skulls*, he and his friends embark on a cross-country trip to Arizona in search of a legendary monastery where they hope to find the secret of immortality. On the journey with Eli, there’s Timothy, an upper-class WASP with a trust fund and a solid sense of entitlement; Ned, a cynical poet and alienated gay man; and Oliver, a Kansas farm boy who escaped his rural origins and now wants to escape death. If they can find the House of Skulls where immortal monks allegedly reside, they’ll undergo a rigorous initiation. But do those eight grinning skulls mean the joke will be on them? For a sacrifice will be required. Two must die so that two may live forever . . . Stretching the boundary between science fiction and horror, Robert Silverberg masterfully probes deeper existential questions of morality, brotherhood, and self-determined destiny in what Harlan Ellison refers to as “one of my favorite nightmare novels.” This ebook features an illustrated biography of Robert Silverberg including rare images from the author’s personal collection.
