World History in Brief

"Every twenty seconds, all over the world, some aspect of life and social ritual is recorded by the camera: empty rooms, the glinting flanks of horses and bathing beauties, society ladies, the dead and dying More than forty major artists and photographers and more than 200 works are included in World Without End, the first major international photography exhibition to be organised from Australia. Some of the most rare, beautiful and unusual images will be presented through vintage prints and publications. Amongst those included are Diane Arbus, Eugène Atget, Pat Brassington, Walker Evans, Carol Jerrems, Man Ray, August Sander, Alfred Stieglitz and Weegee. World Without End examines the extraordinary role of photography in shaping 20th century consciousness. This was a century characterised by prolific creation, circulation and consumption of images. It is now impossible to imagine our reality unmediated by the camera."--Site web de l'éditeur.

World Civilizations

World History

Ancient World History

The primary goal of *World Civilizations: The Global Experience, Third Edition* is to present a truly global history--one that both discusses the development of the world's leading civilizations and also emphasizes the major stages in the interactions among different peoples and societies. The book examines all the world's civilizations, including those in the Western tradition but also those civilizations sometimes neglected in world history texts--for example, the nomadic societies of Asia, Latin America, and the nations and states of the Pacific Rim. *World Civilizations* balances this discussion of independent developments in all the world's major civilizations with comparative analysis of the results of international contact. MARKET Appropriate for anyone interested in World History.

Journal of Technical Writing and Communication

World History, the Human Experience

[This book explores] seven broad themes central to American history: global relations, [the] Constitutional heritage, democratic values, technology and society, cultural diversity, geographic diversity, and economic development. They provide a context for the historical events [which] will help [the student] understand the connections between historical events and see how past events are relevant to today's social, political, and economic concerns. -Themes in American history. Throughout [the book, the student is] asked to think critically about the events and issues that have shaped U.S. history Helping [the student] develop critical thinking skills is a [key] goal of [the text]. -Critical thinking and the study of history.

Social Studies Curriculum Resource Handbook

Todd & Curti's the American nation

Technology in the Middle and Secondary Social Studies Classroom introduces pre-service teachers to the research underpinning the effective integration of technology into the social studies curriculum. Building off of established theoretical frameworks, veteran social studies teacher educator Scott Scheuerell shows how the implementation of key technologies in the classroom can help foster higher-level thinking among students. Plentiful, user-friendly examples illustrate how specific educational tools—including games, social media, flipped classrooms, and other emerging technologies—spur critical thinking and foster authentic
