The Penguin Dictionary of Accounting is the essential reference book for everyone involved in accounting - whether student, businessperson, investor, preparer of financial statements, auditor or accounts manager. Compiled by Christopher Nobes, PricewaterhouseCoopers Professor of Accounting at Reading University, it is the most authoritative guide available on this key subject. Covering international accountancy terms, it provides a comprehensive and global outlook.

The Penguin Dictionary of Sociology

In *The New Masters of Capital*, Timothy J. Sinclair examines a key aspect of the global economy—the rating agencies. In the global economy, trust is formalized in the daily operations of such firms as Moody's and Standard & Poor's, which continuously monitor the financial health of bond-issuers ranging from private corporations to local and national governments. Their judgments affect unimaginably large sums, approximately \$30 trillion in outstanding debt issues, according to a recent Moody's estimate. The difference between an AA and a BB rating may cost millions of dollars in interest payments or determine if a corporation or government can even issue bonds. Without bond rating agencies, there would be no standard means to compare risks in the global economy, and international investment would be problematic. Most observers assume that the agencies are neutral and scientific, and that they interpret their role in narrowly economic terms. But these agencies, by their nature, wield extraordinary power and exert massive influence over public policy. Sinclair offers a highly accessible account of these institutions, their origins, and the rating processes they use to judge creditworthiness. Illustrated with a wide range of cases, this book offers a fresh assessment of the role of an often-overlooked institution in the dynamics of modern global capitalism.
