Collecting & Preserving WWII History Since the end of World War II, veterans, collectors, and history buffs have bought, sold, and traded the "spoils of war." Souvenir collecting began as soon as troops set foot on foreign soil. Soldiers looked for wartime trinkets and keepsakes to remind them of their time in the service, validate their presence during the making of history, and generate income when they returned home. Today these items help us understand and define a time when almost the entire world was at war. Newly expanded and completely updated, Warman's World War II Collectibles, 3rd edition, is a comprehensive full-

maturity by a Poe-inspired Jules Verne. The modern wonder tale's highly-charged vision expressed the hopes and the fears, and the delights and the traumas, engendered by "new worlds idealism"--that Western pursuit of both mechanical and geographical conquest. Exploring realms belonging to childhood, literature, science, and history, this innovative study weaves together the histories of wonder tales and children's toys, focusing specifically on their modern aspects and how they reflect and express the social attitudes of that time period beginning around 1859 and ending around 1957.

When Mattel's Hotwheels toy cars exploded onto the market in 1968, venerable Matchbox Toys met the challenge with its Superfast line. The successful result is now presented in the largest book on Matchbox Toys ever produced - so big it is two volumes that celebrate 35 years of Matchbox Superfast production with over 7000 color photos and over 10,000 listed variations! The detailed, beautiful photographs are a great assistance to collectors for identification and color reference. The Variation Listings, found in Volume 1, are arranged alphanumerically by product numbers, making location and cross-referencing easy. Photos are arranged by major product lines, with Basic Models in Volume 1, and everything else from Adventure Pack to White Rose Collectibles arranged alphabetically in Volume 2. Superfast models from late 2004 and early 2005 also appear in Volume 2. Each photo includes the product number and name for easy reference to the Variation Listings. To further aid in identification there are helpful indexes by MAN number and model names (actual base names), as well as a general alphabetical index. The model variations have current market prices for each variation. Rubber toy vehicles seemed to suddenly appear on the scene in dime stores in 1935 and almost as suddenly disappear in 1955, when American-made plastic toys became much more affordable. These fascinating rubber toys were produced by major companies Auburn Rubber Company and Sun Rubber Company, as well as smaller companies like the Judy Company, Gift Craft, Glolite, Viceroy, and Rubber Toys Unique. Author Dave Leopard, long-time collector of American-made toy cars and trucks who specializes in rubber toy vehicles, began researching this subject in 1987 and continues to obtain new items and information, which he has included in this collector's guide. Leopard presents a history of rubber toys and describes the American dime store where these toys were first available. He points out model differences and uses a numbering system to identify the vehicles in the book. The Auburn and Sun Rubber Companies have complete reviews, and pre-war American manufacturers as well as toys produced overseas are given coverage. There are

## **Warman's Hot Wheels Field Guide**

The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brimtoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color
