No Oil, Moses

By the author of the highly acclaimed literary bestseller "Dictionary of the Khazars, " "Landscape Painted with Tea, " Milorad Pavic's second novel, is a tale of mysterious quest that is part modern Odyssey and part crossword puzzle. Gaddafi's Harem

When Master's business calls him away, Molly is left in the care of Mephisto, the owner of a thriving local BDSM club. Molly is both excited and scared to be given

over to Master Mephisto. His power and mysterious intensity have long compelled her from afar. Molly finds herself immersed in a world of strict commands, pervasive sex, and creative torments. Over the course of a week, Mephisto strips away privileges Molly took for granted, and forces her to understand and acknowledge the depths to which she can be made to submit. But a surprising conversation the last day threatens Molly's worldview, as does the strange closeness that develops between them. As the time of Master's return draws near, Molly finds herself deeply and inexorably changed. Publisher's Note: this BDSM fantasy novel depicts "total power exchange" relationships that some readers may find objectionable. This work contains acts of objectification, orgasm denial and speech restriction, caging, anal play and double penetration, BDSM punishment and discipline, M/f, M/m/f, M/m, orgy and group sexual encounters, voyeurism, and limited circumstances of dubious consent.

Dragonquest

Jelena, Zene Koje Nema

A novel of one desperate woman's hopes and desires set in contemporary Prague from "a literary gem who is too little appreciated in the West" (The Boston Globe). Divorced, approaching fifty, and mother to a rebellious fifteen-year-old, Kristyna is beginning to feel the strain of her bleak existence—until she finds a new sense of joy when she begins a love affair with a man fifteen years her junior. But her escape into romance is far from complete. She worries about her daughter Jana, who has been cutting school, and may be using heroin—the latest plague on the city. And Kristyna's mother has forced her to accept the personal papers of her dead father, a tyrant whose Stalinist ideals she despised. At a crossroads in her life, she must find a way to put the past behind her and deal with the challenges of the present in a Czechoslovakia that is still trying to overcome years of communist oppression. In this Washington Post Best Book of 2001, Klima "unflinchingly presents the problems facing modern Prague and civilization in general . . . [and] fills it with mercy" (San Francisco Chronicle).

Captive of Sin

Like one of Escher's drawings, the narrative threads lead one through a dizzying labyrinth of recurring themes, images and characters: God and suicide, food and poison, monks, athletes, soldiers and soccer players all take their places in the circle-dance. Absurdity, surreality and humor abound.

No Saints or Angels

In this exhilarating book, we accompany Umberto Eco as he explores the intricacies of fictional form and method. Using examples ranging from fairy tales and Flaubert, Poe and Mickey Spillane, Eco draws us in by means of a novelist's

techniques, making us his collaborators in the creation of his text and in the investigation of some of fiction's most basic mechanisms.

The Story Factor

This modern classic teaches you to use the art of storytelling to persuade, motivate, and inspire in life and business. Anyone seeking to influence others must first know their own story, and how to tell it properly. Whether you're proposing a risky new venture, trying to close a deal, or leading a charge against injustice, you have a story to tell. Tell it well and you will create a shared experience with your listeners that can have profound results. In this modern classic, Annette Simmons reminds us that the oldest tool of influence is also the most powerful. Showcasing over a hundred examples of effective storytelling drawn from the front lines of business and government, as well as myths, fables, and parables from around the world, Simmons illustrates how story can be used to persuade, motivate, and inspire in ways that cold facts, bullet points, and directives can't. These stories, combined with practical storytelling techniques, show anyone how to become a more effective communicator and achieve their goals.

Mathematics for Economics

This updated classic by Maria Montessori's closest collaborator reveals the inspirations behind the greatest educational innovator of all time. Maria Montessori is important background reading for parents considering Montessori education for their children, as well as for those training to become Montessori teachers. The first woman to win a degree as a Doctor of Medicine in Italy in 1896, Maria Montessori's mission to improve children's education began in the slums of Rome in 1907, and continued throughout her lifetime. Her insights into the minds of children led her to develop prepared environments and other tools and devices that have come to characterize Montessori education today. Her influence in other countries has been profound and many of her teaching methods have been adopted by educators generally. Part biography and part exposition of her ideas, this engaging book reveals through her letters and personal diaries Maria Montessori's humility and delight in the success of her educational experiments and is an ideal introduction to the principals and practices of the greatest educational pioneer of the 20th century. -- The new introduction to "Maria Montessori: Her Life and Work" by Lee Havis, executive director of the International Montessori Society, discusses the changes that have taken place in Montessori education within recent years. -- An updated appendix of Montessori periodicals, courses, societies, films, and teaching materials. -- A revised bibliography of books by and about Maria Montessori.

Dr. Montessori's Own Handbook

Jos od 1962. godine ovaj prozno-poetski triptih je jedno od najomiljenijih stiva danasnjih citalaca. Pripovedacka magnovenja vode citaoca putanjama svetlosti i treptaja i otkrivaju sustastvo same njegove imaginacije i stvaralastva. Kroz vecito iscekivanje Jelene, pripovedac tezi ka stvaranju, kao onom metafizickom koje zivotu onoga kojeg nazivamo stvaraozem zapravo daje pravi smisao. Njegova vecita potraga za poetskom misli, za stvaralackom ispunjenoscu je otelotvorena u Jeleni koja ga cudesno pohodi u ocekivanim, ali i u sasvim neocekivanim prilikama. Dok postoji Jelena, postoji i sam pripovedac. Samo da ne prestanem da je iscekujem, reci ce pripovedac na kraju. Nestanak maste i poriva za stvaranjem za pripovedaca znaci umiranje samo. Jace i ociglednije nego ikada, Ivo Andric ovim delom ispoljava svoju poetsku i filizofsku misao, razotkriva svoje sustastvo.

Unfair to Goliath

This book is intended to follow *Education for a New World* and to help teachers to envisage the child's needs after the age of six. We claim that the average boy or girl of twelve years who has been educated till then at one of our schools knows at least as much as the finished High School product of several years' seniority, and the achievement has been at no cost of pain or distortion to body or mind. Rather are our pupils equipped in their whole being for the adventure of life, accustomed to the free exercise of will and judgment, illuminated by imagination and enthusiasm. Only such pupils can exercise rightly the duties of citizens in a civilised commonwealth. The first four chapters are mainly psychological, showing the changed personality with which the teacher has to deal at six years of age, and the need for a corresponding change of approach. The secret of success is found to lie in the right use of imagination in awakening interest, and the stimulation of seeds of interest already sown by attractive literary and pictorial material, but all correlated to a central idea, of greatly ennobling inspiration—the Cosmic Plan, in which all, consciously or unconsciously, serve the great Purpose of Life. It is shown how the conception of evolution has been modified of late through geological and biological discoveries, so that self-perfection now has to yield precedence to service among the primary natural urges. The next eight chapters show how the Cosmic Plan can be presented to the child, as a thrilling tale of the earth we live in, its many changes through slow ages when water was Nature's chief toiler for accomplishment of her purposes, how land and sea fought for supremacy, and how equilibrium of elements was achieved, that Life might appear on the stage to play its part in the great drama. Illustrated as it must be by fascinating, charts and diagrams, the creation of earth as we now know it unfolds before the child's imagination, and always with emphasis on the function each agent has to perform

in Nature's household, whether consciously or unconsciously, failure in this alone leading to extinction. So the tale proceeds till Palaeolithic Man appears, most significantly traced by the tools he used on his environment rather than by physical remains of so slight a creature. The new element of mind is brought to creation by man, and from that time the children are helped to see the great acceleration that has taken place in evolution. They learn to reverence the earliest pioneers, who toiled for purposes unknown to them but now to be recognised. Nomadic men and settlers alike contributed to build up early communities, and by interchanges of war and peace to share and spread social amenities. From chapter thirteen brief descriptions are given of some of the earliest civilizations, particularly with a view to their impacts on each other, showing human society as slowly organising itself towards unity, just as, in the individual human being, organs are built around separate centres of interest, to be later connected by the blood-circulatory system and the nerves, into an integrated human organism. So the child is led, by review of some of the most thrilling epochs of world-history, to see that so far humanity has been in an embryonic stage, and that it is just now emerging into true birth, able to consciously realise its true unity and function. The last chapters go back to the psychological point of view, urging on educators the supreme importance, to the nation and to the world, of the tasks imposed on them. Not in the service of any political or social creed should the teacher work, but in the service of the complete human being, able to exercise in freedom a self-disciplined will and judgment, unperverted by prejudice and undistorted by fear.

Secret of Childhood

Annie John is a haunting and provocative story of a young girl growing up on the island of Antigua. A classic coming-of-age story in the tradition of The Catcher in

the Rye and *A Portrait of the Artist as a Young Man*, Kincaid's novel focuses on a universal, tragic, and often comic theme: the loss of childhood. Annie's voice—urgent, demanding to be heard—is one that will not soon be forgotten by readers. An adored only child, Annie has until recently lived an idyllic life. She is inseparable from her beautiful mother, a powerful presence, who is the very center of the little girl's existence. Loved and cherished, Annie grows and thrives within her mother's benign shadow. Looking back on her childhood, she reflects, "It was in such a paradise that I lived." When she turns twelve, however, Annie's life changes, in ways that are often mysterious to her. She begins to question the cultural assumptions of her island world; at school she instinctively rebels against authority; and most frighteningly, her mother, seeing Annie as a "young lady," ceases to be the source of unconditional adoration and takes on the new and unfamiliar guise of adversary. At the end of her school years, Annie decides to leave Antigua and her family, but not without a measure of sorrow, especially for the mother she once knew and never ceases to mourn. "For I could not be sure," she reflects, "whether for the rest of my life I would be able to tell when it was really my mother and when it was really her shadow standing between me and the rest of the world."

Holy Scoundrel

Gene Control offers a current description of how gene expression is controlled in eukaryotes, reviewing and summarizing the extensive primary literature into an easily accessible format. Gene Control is a comprehensively restructured and expanded edition of Latchman's *Gene Regulation: A Eukaryotic Perspective*, Fifth Edition. The first part of the book deals with the fundamental processes of gene control at the levels of chromatin structure, transcription, and post-transcriptional processes. Three pairs of chapters deal with each of these aspects, first describing the basic process itself, followed by the manner in which it is involved in controlling gene expression. The second part of the book deals with the role of gene control in specific biological processes. Certain chapters deal with the importance of gene control in cellular signaling processes and for normal development of the embryo. Another chapter discusses the key roles played by gene-regulatory processes in the specification of differentiated cell types such as muscle cells and neurons. The final chapters discuss the consequences of errors in gene control; the relationship between gene misregulation and human diseases, especially cancer; and potential therapies designed specifically to target particular levels of gene control. Gene Control will be of value to students in biological sciences, as well as to scientists and clinicians interested in how genes are regulated in health and disease.
