American Photographer

Electronic Flash Photography

Camera 35

The Complete Guide to Night & Low-light Photography

The Complete Idiot's Guide to Portrait Photography

Starting with a technical discussion and then tackling a wide range of themes and lighting situations, this book presents specific guidelines for shooting low-light landscapes, portraits, buildings, carnivals, and more. 200 color, 80 b&w

illustrations.

Camera

A detailed guide to nature photography describes necessary techniques and equipment and offers instructions on the interpretation and accurate representation of nature

Navajo Times

This guide opens with in-camera flash basics, then moves to topics such as exposure flash readings, detachable units, flash guide numbers, bounce flash, and fill flash, then covers advanced methods for using off-camera flash, flash brackets, power packs, remote triggering, and other techniques.

Modern Photography

Journal of Applied Photographic Engineering

Beginner's Guide to Photographing People

Teaches the steps involved in creating portraits by discussing tips on poses, lighting, makeup, framing, and equipment purchasing and maintenance.

British Journal of Photography

Newsweek

Updated throughout to reflect recent technological advances and changes, Photojournalism: Content & Technique, second edition, continues the commitment to contemporary coverage. Your students will learn about the principles, tools, and techniques needed to become effective photojournalists. Like the previous edition, parts and chapters progress logically from beginning to more advanced ideas, yet each chapter functions as an independent unit giving you greater flexibility in the classroom.
