This book starts with a macro view of accounting information by presenting real financial statements. The authors establish how financial statements communicate the financing, operation, and investing activities of a business. To integrate the use of financial statements for decision making, the authors identify a finite set of tools necessary to make business decisions based on financial information. The Decision Toolkit is provided for the reader and integrated throughout the text.

Due to the emergence of IFRS as the required convention for reporting to stock exchanges in the European Union and other important markets, accountants must gain a strong understanding of these standards. Intermediate Accounting integrates this new information throughout the chapters so they'll learn how to apply the new global accounting standards. Global examples are presented to clearly show how the information is utilised in the field. The use of various currencies is also explored, which is critical for accountants to know in today's global businesses environment.
